Analyzing "Taste of Leyden" Financials

5Use the "Taste of Leyden" financial records to complete this assignment. The document is linked below.

Taste of Leyden Financial Records

Use the sheet tab titled "Invoices: Sale 1" to answer the following questions about our first sale.

1. How many total products did we sell during Friday's sales?
2. How many products did we have left over after Friday's sales?
3. Which item did we sell the most of?
4. Which item did we sell the least of?
5. Based on the number of actual items we sold, what was our expected (***NOT*** potential) revenue?
6. What was our actual revenue?
7. Is this difference indicate a good or a bad outcome for our business?
8. What reasons could account for the difference in expected and actual revenue?
9. Overall, did we make a profit or experience a loss based on Friday's sales and the costs of all our products?
10. What changes or suggestions should we consider for our next sale?

Use the sheet tab titled "Invoices: Sale 2" to answer the following questions with regards to our next sale on Friday.

1. Which items did we decide to reorder to our next sale?
2. In total how many items will have available to sell during our next sale?
3. If we sell out of ALL products, how much revenue will we bring in?
4. Does that number represent our potential profit for the next sale? Why or why not?

Use the sheet tabs titled "Profit & Break Even Calculations" and "Dividend Share" to answer the following questions.

1. What does the profit figure of $246.34 represent? Is that how much profit we have made so far? If not, what do we need to do in order to make that profit figure true?
2. If we sell out of all our current products at the next sale, how much will your dividend share be?
