

## Goals:

1. Review overall operational plan
  - a. Identify delta between plan and overarching strategic goals
  - b. Identify specific goals needed to meet overall goal
2. Evaluate these goals against the following questions
  - a. What needs the overall OpenMRS community to achieve that goal
  - b. What can be parsed out to others
3. Next steps for 2017
  - a. Proposed timeline for op plan and goals
  - b. Who else should be involved
4. Other thoughts?

From the LT call 1/12/17 ( who is we and who isnt we)

- community involvement last year but died off
- identifying community leads/partnership leads to some specific work products that we identify
  - join the leadership calls
  - intersection with the operational plan
- targets for 2017
  - separation between what we are committing to doing with current resourcing
  - current resourcing including business as usual
  - there is a list of other things that we know what we can do
    - try to plug ways into those things that can be done by externals
    - explicit between current resources and then what we would like to do
  - optional/nice to have projects are explicitly identified and we ask for resources/people to help with these

1. Review of the operational plan
2. Proposed changes to the current plan

- a. Objective three-- good progress on this objective
  - i. Time to push less effort into this as we made progress here
- b. Siloed approach to 6 objectives
- c. Partnerships effort
  - i. Tech partners
  - ii. Distributions
  - iii. Service providers
  - iv. Partnerships within 6
  - v. Move education under that
- d. 'Ecosystem development and support '
  - i. Organizations that can implement / support
  - ii. Agree on the scope of it
  - iii. Community of practice/etc
- e. Strategic Objectives
  - i. Platform
  - ii. Reference application
  - iii. Ecosystems- put into a goal format
  - iv. Education
  - v. Operational support
- f. What hasnt been included
  - i. Leadership
  - ii. Functions that we should be doing
    - 1. Community management and community improvement
- g. Distinction between what we have for resources for 2017
  - i. Limited resource availability
  - ii. Limited time involvment
- h. Identifying and including stretch goals for the objectives
  - i. What is the most important thing to do
  - ii. Need to do it but can't commit to it right now
- 3. Platform- will add
- 4. Reference Application- Requirements/ production
- 5. Distributions- four objectives
  - a. What is useful and what is useful
