

DeWill: The Struggle against Oblivion

Introduction:

DeWill is a decentralized Will that helps crypto users pass their assets to their heirs. Whether it's their family members, loved ones, or their wonderful pets, it's just a click away to create the (De) Will.

This document is a draft on how DeWill uses philosophical characters to help and engage the audience, helping them understand, educate and save their crypto assets in Will, in a secure manner.

Characters:

1. **Frank:** Frank is a crypto enthusiast, who's been contributing to space for 2 decades. He's in his 70's now, enjoying his retirement, happily spending his days with his lovely family. He has saved a lot in crypto, due to his love for Blockchain.
2. **Mary:** Mary is an elderly lady, a former Receptionist, and the wife of Frank. She is a lovely lady, but computer's aren't her expertise.
3. **Sarah:** Sarah is a BioTech student, who's currently pursuing her bachelor's degree. She uses tech, but needs a learning curve to use a sophisticated ledger technology like Blockchain. She is Frank's older child.
4. **Little Ben:** Ben is a 10 year kid, who's enjoying his childhood. He's in his elementary school, innocent and has years to be matured to handle crypto assets. He is Frank's younger child.
5. **Angel:** Angel is a mythological character who does good deeds to the people. She lately gets lots of complaints about people's crypto assets being stuck in Oblivion (

a lost world, where Dewill lives). She finally finds a way, pushes dewill to adopt to the proposed solution to returns the lost assets.

6. **Dewill:** Dewill is a mythological character who lives in Oblivion. He sees a lot of lost crypto assets coming to him to oblivion, and all he does is observe them with a grin. But with the latest agreement with Angel, he is forced to return the assets to the users/ their heirs through Wills.

But he currently has 13% of bitcoin under his radar and a lot of other Crypto assets, so he's so glad Decentralized Will's are not yet popular.

Story:

Frank want's to secure his Assets:

Frank is a practical person. He knows human life isn't eternal, and enjoys every day with his wonderful family.

Lately Frank has created Will's for all the Properties he owns. He's never been more relieved that his assets will be passed to his heirs securely, until he remembers regarding his crypto investments.

Frank starts wondering if there are any solutions that replicate **Will** in the world of decentralization. Then he finds **DeWill**. He contacts Angel's, asks them to create a Will on his part, and secures his assets with **DeWill**.

Now he lives in peace, happy that the assets will securely reach his family, in case of lost funds, or him being deceased.

How he created the Will:

Step 1: He visited DeWill's website: <https://dewill.vercel.app/>

Step 2: He added his recipients or heirs at <https://dewill.vercel.app/dewill> :

The screenshot shows the 'ADD RECIPIENT' form in the DeWill application. On the left, there is a sidebar with a wallet balance of 11.826852326130105218 ETN and a contract balance of 15.680387436357893449 ETN. The main form area is titled 'ADD RECIPIENT' and contains the following fields:

- Wallet Address: 0xFb67A03a3Bf2f7b7D7d9528349B1eC23686Ce432
- First Name: Mary
- Last Name: Jane
- Primary Email: yaswanthramanam@gmail.com
- Secondary Email: yaswanthramanam2001@gmail.com
- Age: 068
- Allocation Percentage: 035 %
- Country: Switzerland
- Gender: Female
- Token: Electroneum

At the bottom of the form are 'CANCEL' and 'SAVE RECIPIENT' buttons. On the right side of the form, there is a vertical scrollbar and a button labeled 'ADD RECIPIENT'. In the background, there is a dark illustration of a character with spiky hair and a red collar.

Step 3: He added his interest for staking. (Optional).

The screenshot shows the 'CREATE YOUR WILL' form in the DeWill application. On the left, there is a sidebar with a wallet balance of 11.826852326130105218 ETN and a contract balance of 15.680387436357893449 ETN. The main form area is titled 'CREATE YOUR WILL' and contains the following fields:

- Will Details: A Will To My Lovely Family
- Interested in Staking: ☒
- RECIPIENTS: A list of three recipients with their names, addresses, emails, and allocation percentages.

Name	Address	Email	Percentage
Mary Jane	0xFb67A03a3Bf2f7b7D7d9528349B1eC23686Ce432	yaswanthramanam@gmail.com	35 %
Sarah Jane	0xFb67A03a3Bf2f7b7D7d9528349B1eC23686Ce432	yaswanthramanam@gmail.com	33 %
Little Ben	0xFb67A03a3Bf2f7b7D7d9528349B1eC23686Ce432	yaswanthramanam@gmail.com	32 %

At the bottom of the form are 'CANCEL' and 'SAVE WILL' buttons. On the right side of the form, there is a vertical scrollbar and a button labeled '+ ADD RECIPIENT'. In the background, there is a dark illustration of a character with spiky hair and a red collar.

4. And he submitted his Will, successfully.

Sarah's Birthday Arrives:

It's just 3 days for Sarah's birthday. She's a great child and she barely asks for anything. But lately, she asked if he could buy her a new laptop, and Frank has yet to answer.

A laptop wouldn't be a bad gift. So, Frank is planning for a surprise. But Frank doesn't have cash in hand. And it wouldn't be that exciting to just give some boring cash in hand.

So, he thought of gifting her some Crypto Tokens instead, so she can buy it through them in a marketplace.

He navigated to <https://dewill.vercel.app/send>, selected **recipient** as Sarah, and sent her a certain **percentage** of available tokens. He also generated an email through AI as he can wish her the best for her Birthday.
