

Ao Yan earned his Master of Research degree in Nanomaterials from Imperial College London in 2024, where he focused on ultrafast spectroscopy to study charge carrier dynamics in multilayer MoS<sub>2</sub> photodetectors. He previously obtained a Bachelor of Engineering degree in Materials Science and Engineering from the University of Science and Technology Beijing in 2023, gaining experience in microelectronics fabrication and 2D materials. In January 2025, he began his PhD studies at the National University of Singapore under the supervision of Prof. Aaron Thean. His research interests include photonics integration for computing and data processing.
