Creating order

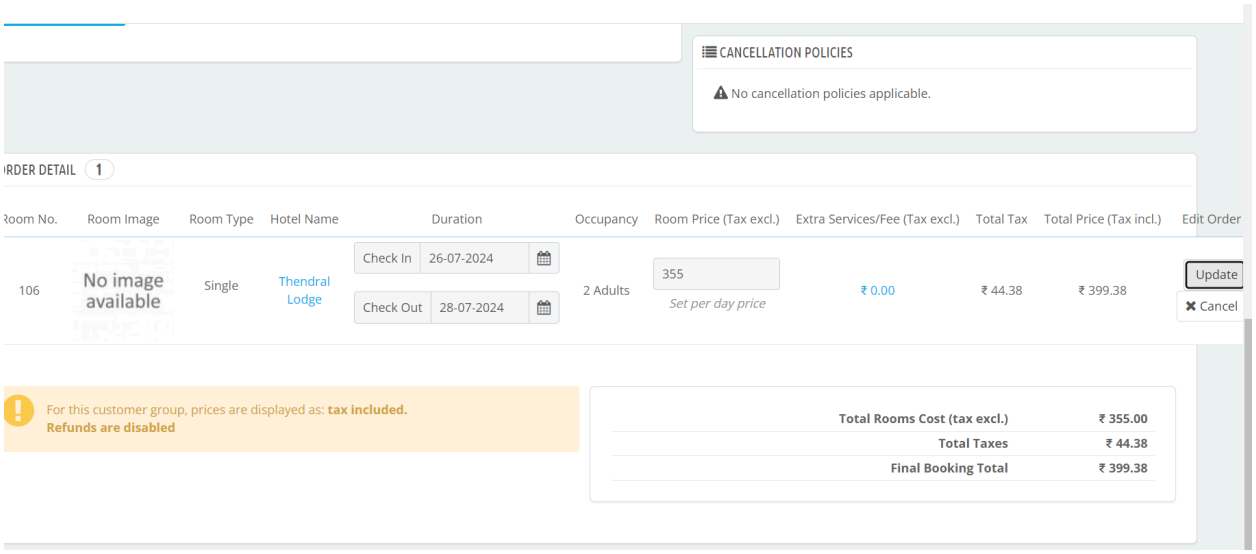

Checked in with dates as 27th for checkout as per the original order

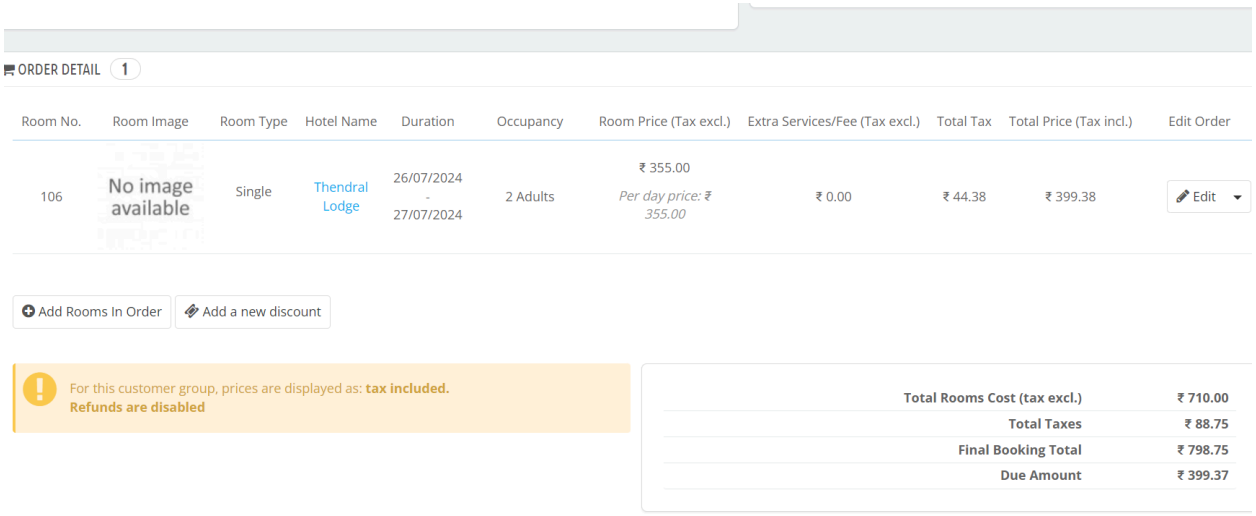

Now modifying order to change the date to 28th

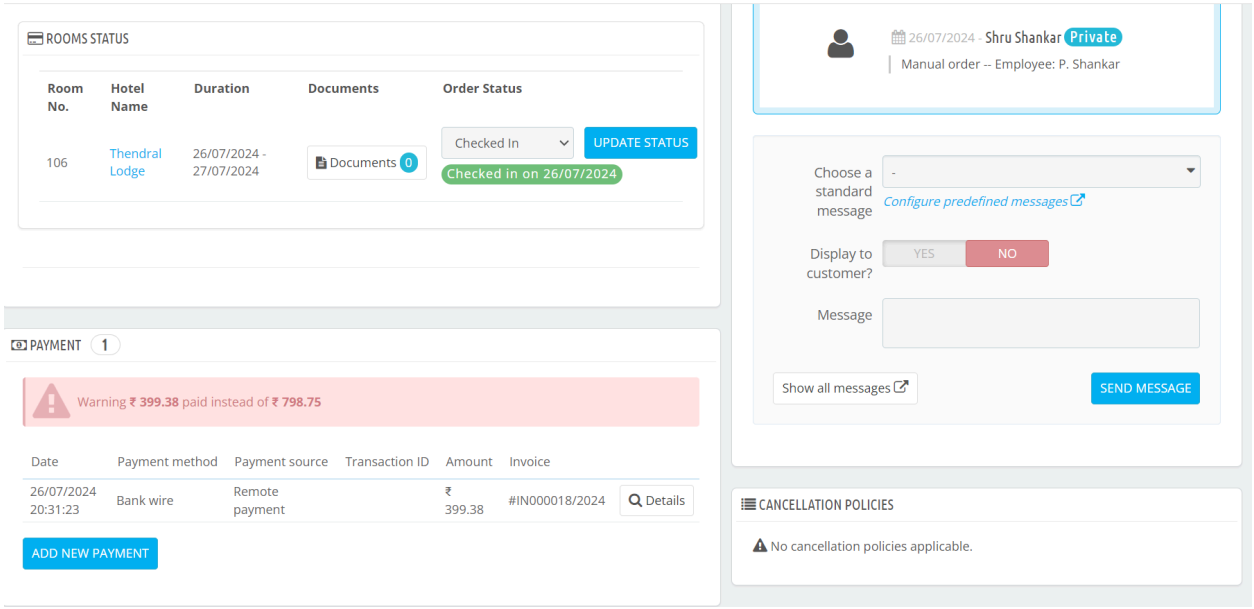

I click updqate once it shows the “r usure message “ I press ok but nothing happens

I click update once more

Again the “r u sure “ message comes and then the price as you can see has changed for the revised dates but the booking dates have not changed

Also the revised payment deficit is displayed in the payment section as well but the room checkout date in the room status section also has not changed.

However if I raise the order from the portal I am able to modify.
