# Mopping the Gym Floor and Knitting

## Example Problems

1. We are mopping the gym floor. We have  $\frac{1}{3}$  of the floor to clean and there are 2 workers. How much of the floor does each worker clean?
2. We are knitting a scarf that will be 4 feet long. So far, we have  $\frac{1}{3}$  of a foot knitted. How much of the scarf is done, so far?
