《Backstory》

Vik was born in Jump City to a poor family who couldn't afford a child so he was put in foster care. He was bounced home to home and orphanage to orphanage. But he was a testy person and pushed people away which often got him overlooked. The only thing he was good at and loved was technology and how things worked and ran. He began studying and started to fix things and upgrade things and make things. So by the time he was 18 and out of the system he had a lot of knowledge and didn't know what to do. He had a partner he met in the system but he passed away from a mugging shortly after they got out of the system. So he became a vigilante with his skills mainly being like a merc by taking

gigs from some shady people but never anything too bad. Viktor became “V” and he would steal or hack things for money. He ends up being caught by robin stealing and he agrees to not jail them if he joins the team. V agrees and is taken to the tower to move in. They can be paired with Beast Boy, Robin, Raven, or Jericho (if you know Jericho he is my favorite and I want to play against him so badly!)

『*Hero or Villain or Anti-Hero*』

Anti - hero/Vigilante turned hero
