Article Info

Accepted : xx-xx-xxxx

Revised : xx-xx-xxxx

Approved: xx-xx-xxxx

Publish : xx-xx-xxxx

Keyword:

Ditulis maksimal 5 kata yang mewakili tulisan dan dipisahkan dengan tanda koma (10pt))

Abstrak

Abstrak dibuat dalam dua bahasa yakni Bahasa Indonesia dan Bahasa Inggris. Abstrak terdiri dari satu paragraf, jumlah kata antara 150 - 250 kata. Abstrak ditulis menggunakan *MS-Word Font TNR 10 jarak 1 spasi* tidak melebihi 1 lembar dengan format A4-satu kolom. Abstrak harus memuat pendahuluan, metode, hasil, kesimpulan dan implikasi penelitian. Kecuali jika artikel berupa kajian atau review dapat disesuaikan. Abstrak tidak memuat uraian matematis dan bahasa statistik, tidak mengandung kutipan, tidak menggunakan singkatan.

Keywords:

Write a maximum of 5 words that represent a writing and separated by commas (10pt)

Write the title in English (if the article title is in Indonesian)-TNR, Italic 10

Abstract

Abstracts are made in two languages, namely Indonesian and English. Abstract consists of one paragraph, the number of words between 150 - 250 words. Abstracts are written using MS-Word Font TNR 10 with 1 space spacing not exceeding 1 sheet with A4-one column format. The abstract must contain an introduction, methods, results, conclusions and research implications. Unless the article is in the form of a study or review, it can be adjusted. The abstract does not contain mathematical descriptions and statistical language, does not contain quotations, does not use abbreviations.

How to cite :

First author, Second author., & Third author. (20xx). The title. *JRAMB*, Vol(No), xx-yy. doi: <https://doi.org/10.26486/jramb.vxiy.xxyy>

INTRODUCTION □ 11 TNR, The distance between subtitles and content are 6 pt before space and 6 pt after space

The introduction is written with upright TNR-11 1 space, and 0 pt before the space, and 0 pt after the space. Each paragraph begins with a word that is indented into 5 digits. The introduction contains (1) research problems; (2) insight and problem solving planning; (3) summary of the theoretical studies and the current study result related to the observed problems (gaps), and (4) research objectives and research contributions. If the article is in the form of a study or review, it is sufficient to present the problem, analytical framework, and sub-headings that can be adapted to the content of the study or review being carried out. The overall length of the article manuscript is minimum of 7 pages and maximum of 14 pages.

METHOD □11 TNR, 6 pt before space and 6 pt after space

This section contains methods, types of data, data sources, data collection techniques, data analysis techniques, measurement of variables. Made in the form of flowing paragraphs and not numbered. Statistical symbols use standard symbols and terms such as t-test instead of t-count.

Email : jramb@mercubuana-yogya.ac.id

Qualitative research such as case studies must mention the researcher's presence, research subjects, and participating informants, as well as the methods used to collect data, research location, research duration, and a description of research results validation.

RESULT AND DISCUSSION □ 11 TNR, 6 pt before space dan 6 pt after space

Result

- 1.
- 2.
3.
 - 1.
 - 2.
 - 3.
 - 4.
 - 4.1

It contains the result of research finding where the result and discussion are made separately. The use of tables, figures and so on is only as a support that clarifies the discussion. Tables and figures are limited to truly substantial supports, for example tables of statistical test result, images of model test result and so on. The use of tables is recommended not to be too long, and if it is necessary to include a long table, it is made in the attachment.

Examples of presentation of tables and figures

Tabel 1. Table title

Year	Man	Woman	Result
2009	60	28	88
2010	59	30	89
2011	29	16	45
2012	27	20	47
2013	20	17	37

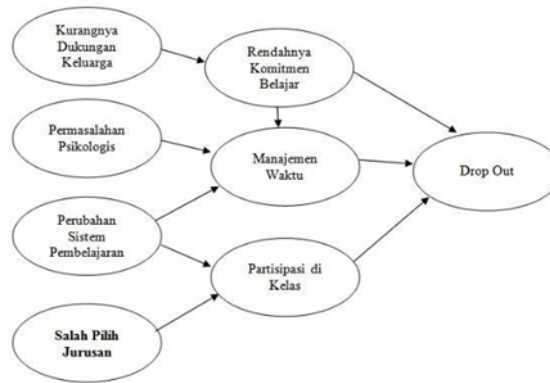

Figure 1. Image title

Discussion

In the discussion, the author examines the results of his findings and is cross-referenced with theoretical studies and empirical studies, which are written in a systematic, critical, and informative manner. The result discussion is argumentative concerning the relevance between the results, theory, previous research and the empirical facts found, as well as showing the novelty of the findings. The article discussion aims to: (1) answering research problems and questions; (2) showing the ways in which the findings were obtained; (3) interpreting findings; (4) connecting the findings with existing knowledge structures; and (5) generating new theories or modifying existing ones

The research result must be clearly concluded in answering research questions. Interpreting the findings must be done by using existing logic and theory. The fact findings found in the research field are integrated with previous studies or existing theories. This must be supported by reliable references. In case, the researcher brings a new theory, the old theory can be confirmed or rejected, or the old theory can be modified.

CONCLUSION □11 TNR, 6 pt before space dan 6 pt after space

This section contains a conclusion written in one or two paragraphs. Conclusion is written in essay form, not in numerical form. Conclusion is about research questions and referring to the purpose of writing. Conclusion is not explained in statistical sentences. If the author needs to write suggestion or recommendation, write them down together in the second paragraph. Also write down the research implication.

BIBLIOGRAPHY □11 TNR, 6 pt before space dan 6 pt after space

Quotation and bibliography are written using APA style 6th Edition compiled with the latest version of Mendeley software. References used are at least 20 sources and at least 80% from primary sources (reputable journals and research reports including theses and dissertations) in the last 10 years of publication. Bibliography is made by including doi (if any).
