

Google Security

- From your Google inbox or account, Click on your user identifier in the upper right.
- Select Manage your Google Account

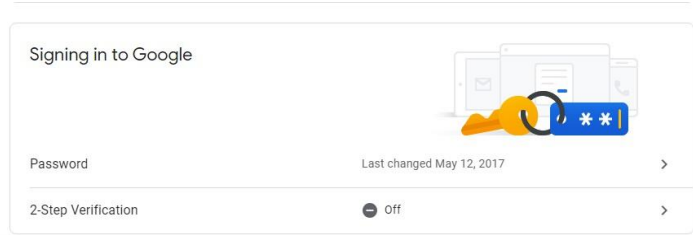

- From the Index on the left, choose Security
- Select Signing in to Google

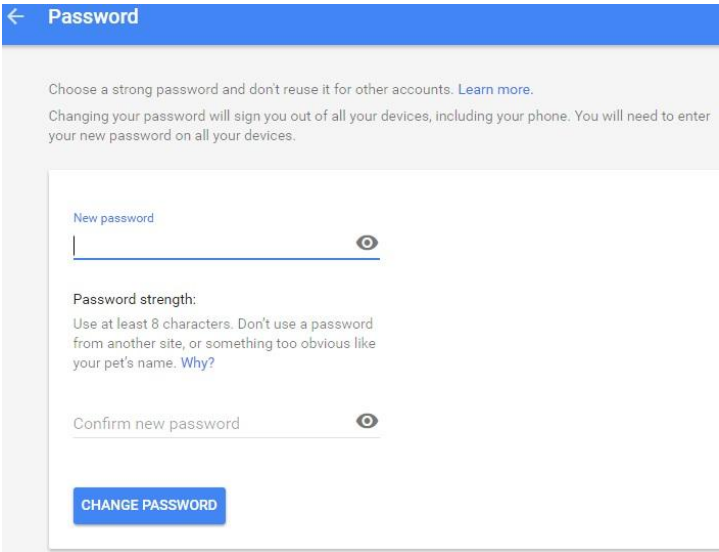

Password

Change Password

- Select the Right Arrow by
- Enter current Password

- Enter and confirm your new password
- Hit Change Password Button

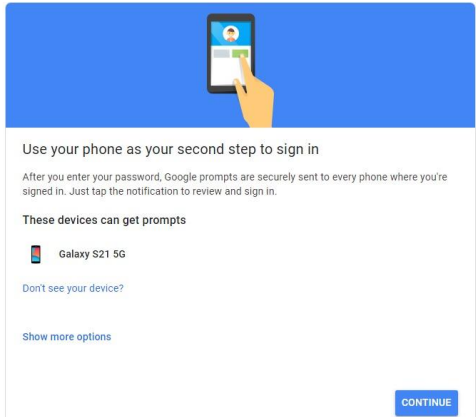

2 Step Verification

- Select the “2 Step Verification” arrow. It defaults to off.
 - If you want to change verification methods it will show as on - hit the arrow.
- Enter Password

Note - Google prompts are the Default 2nd Step. They are sent to phones you are signed into with your BPS Google Account.

- A message will come to your phone asking if it was you trying to sign in - tap yes. OR no if it wasn't you
- Next screen, you should see your phone.
- Continue

← 2-Step Verification

- Next screen - enter Phone number - probably should be your Cell phone so you can get a text anywhere. If you add a regular phone, it will call you with the information needed, but you need to be by that phone.
 - Select how to receive the code
 - Hit Send
 - You will get a text message on your phone
 - Enter the code from the message
 - Hit NEXT
- Select Turn on

Turn on 2-Step Verification?

Second step: Google prompt (default)
Backup option: Voice or text message

You'll stay signed in to CRabstojek@bpsnebr.org on these devices: Galaxy S21 5G.

You might be signed out of your other devices. To sign back in, you'll need your password and second step.

TURN ON

Confirm that it works

Google just sent a text message with a verification code to (402) 239-3578.

Enter the code

Didn't get it? [Resend](#)

[BACK](#) [NEXT](#)

← 2-Step Verification

Almost there! Add a backup option

If you lose your phone or your second step is unavailable, you'll need a backup option to help you get in to your account.

Google will only use this number for account security.
Don't use a Google Voice number.
Message and data rates may apply.

How do you want to get codes?

☒ Text message ☐ Phone call

[USE ANOTHER BACKUP OPTION](#) [SEND](#)

Check Devices you are signed in to.

Sometimes you may get an email saying someone has signed into your Google Account.

- Always change your password if you think something fishy might be happening.
- Check what devices you are signed in and sign out if needed.
 - While in Security, Find "Your devices"
 - Select Manage Devices

Ipad

If you have issues with your iPad not being able to access your Google Account - try this:

- Create an App Password for your iPhone or iPad
An App Password allows 2-Step Verification users to access their account from apps or devices that do not support verification codes.
 - Note: If you have iOS 8.3 or higher on your device, you will no longer have to use App passwords to use 2-Step Verification.
- Go to the App Password Page - [Click HERE](#)
- You may be asked to sign in to your Google Account.
- At the bottom, click Select app and choose the app you're using, for example, "Mail".
- Click Select device and choose "iPhone" or "iPad"
- Click Generate.
 - It will generate a 16 character code
- Click DONE
- On your iPad:
 - Go to Settings > Mail, Contacts, Calendars.
 - Select your Google Account from the list.
 - Click Account.
 - When it asks for your Google Password, enter your App Password in the password field instead of your actual Google Password
 - Note: If you have iOS 8.3 or higher on your device, you will no longer have to use App passwords to use 2-Step Verification.
