

HSD In-District COVID Testing - Objective, Process & Results

As of Jan 10, 2022 This process/information only applies to courtesy testing performed in the school nurses office for symptomatic students and staff prior to being sent home for quarantine when displaying COVID-like symptoms in school. For information about HSD's before/after school testing, please refer to this document.

The Objective

- The objective of this initiative is to make PCR testing easily accessible for students and staff in two situations:
 - (1) PCR testing (nasal, shallow swab) in the school nurse's office for **symptomatic** staff and students **before being sent home** for the required quarantine period. Parents will be required to administer the swab for PS-5 students under the nurse's guidance (option for parent or nurse to administer in grades 6-12). Symptomatic students/staff requiring a COVID test while not in school should seek a local testing provider (e.g., CVS, Rite Aid, etc.).
 - (2) PCR testing (nasal, shallow swab) in the HMHS Cafeteria for **asymptomatic** students and staff. Asymptomatic students/staff individuals may voluntarily participate in the [District's weekly after-school testing program](#).
- The Pre-Registration process applies both to the in-office and voluntary after-school testing.
- Before testing can be done, parents must complete the HSD Covid-19 Testing Consent form in [Genesis](#) (under the forms link). Consent is only needed once, and once selected, parents can change their consent status. (Coincidentally, Genesis is the name of our Student Information System and the Lab conducting the testing)

The Process

1. Pre-Registration: Please scan the above QR Code using your Camera app.
 - If QR Code is not working, the direct link is https://genesislabs.labcollector.online/extra_modules/lsmremote/index.php?action=preregister&job_pre_g=1&req=9196
 - Make sure all required information is complete and correct.
 - All required information is indicated by an *
 - Also, please ensure you complete the following insurance information:
 - Picture ID (license) - if the patient is a minor, please use the ID of a parent and/or guardian and make a note of this circumstance.
 - Policy ID
 - Policy Group #
 - Upload of Insurance Card

You may direct questions to either the school nurse or [Dr. Gino Priolo](#), Assistant Superintendent

2. Once successfully registered, you should receive a QR Code to the email address you provided. Please present this to the school nurse.

The Results

- If you provide both a cell phone number and an email address, you will receive messages in both places. There will be two messages in total. The first message will provide you with a TOKEN # and inform you that results are pending.
- You will receive a SECOND message once the results are finalized, and that will give you a website link to access the results using the TOKEN # and the date of birth.
- Results can take anywhere from 1-3 days, depending on lab volume. HSD staff have no control over this timeline.

You may direct questions to either the school nurse or [Dr. Gino Priolo](#), Assistant Superintendent
