# Privacy Policy

Currency Converter · Live FX (“the App”)

Data controller: Yevhen Vinnyk (“the Developer”, “we”)

Effective date: July 10, 2026

## 1. Overview

The App is designed to work without accounts and without collecting personal information. This policy explains what little data is involved in running the App and where it lives.

## 2. No Accounts, No Profiles

The App requires no registration. We do not collect your name, email address, contacts, location, or any personal profile, and we do not sell data to anyone.

## 3. Data Stored on Your Device

Your settings (language, theme, haptics), selected currencies, favourites, conversion history, and custom rates are stored locally on your device (and in the app group shared with the App's widgets). This data never leaves your device through us. Deleting the App deletes this data.

## 4. Purchases

Payments are processed entirely by Apple; we never see your payment details. To validate subscriptions and unlock premium features, the App uses the Adapty SDK, which processes a device identifier (such as the identifier for vendors, IDFA) and purchase/subscription status on our behalf. Adapty acts as a data processor for this purpose; their privacy policy is available at [adapty.io/privacy](https://adapty.io/privacy).

## 5. Rate Data Requests

To show exchange rates, the App requests rate tables from third-party data services over the internet. Like any internet request, these requests expose your IP address to the serving infrastructure (content delivery networks). No personal information, identifiers, or usage data are attached to these requests by the App.

## 6. Analytics

The App contains no third-party analytics or advertising SDKs. Apple may provide us with aggregated, anonymised App Store statistics (such as install counts) subject to the choices you make in your device's privacy settings.

## 7. Children

The App is not directed at children under 13, does not collect personal information from anyone, and contains no social features.

## 8. Security and Retention

Data stored on your device is protected by iOS's standard security mechanisms. Because we hold no copies of your data, there is nothing for us to retain or delete on our side; removing the App from your device removes your data.

## 9. Your Rights

Depending on your jurisdiction, you may have rights regarding personal data (access, correction, deletion). Since the App stores data only on your device, you can exercise these rights directly by editing or deleting data in the App, or by deleting the App. For anything related to purchase validation data processed via Adapty, contact us and we will assist.

## 10. Changes to This Policy

If the App's data practices change (for example, if new data sources or features are added), this policy will be updated and the effective date revised before the changes ship.

## 11. Contact
