

Douglas MacArthur was under command of the United Nation Forces. After Korea split into communist and democratic, North Korea invades South Korea and almost takes it over. The United Nations managed to not let it be taken but the Chinese started helping North Korea and there troops stayed at the 38th parallel. North Korea invaded South Korea in June 1950. This event is important because it marked the first major armed conflict of the Cold War. I think this impacted the economy because the war basically happened for no reason. When a war happens the economy gets affected.
