Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

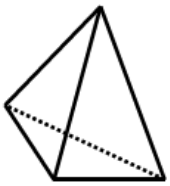

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

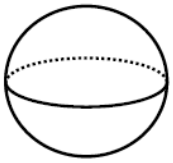

Direction: Choose the best answer.

1. Which is a two-dimensional geometric figure? (Understand, MA 2.2 G.7/2)

A. 

B. 

C. 

D. 

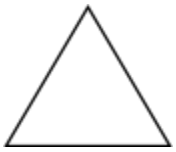

Solution: 

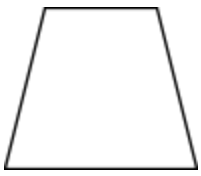

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

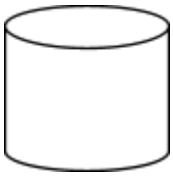

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

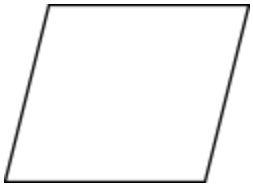

The dimension of a mathematical space is informally defined as the minimum number of coordinates needed to specify any point within it. A plane has a dimension of two.

2. Which one is different from the others? (Understand, MA 2.2 G.7/2)

A. 

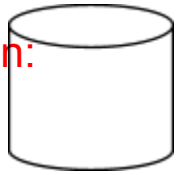

B. 

C. 

D. 

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

Solution: 

This is only one three-dimensional figure, while the others are two-dimensional.

3. If we cut a right hexagonal pyramid parallel to the base, which two-dimensional geometric figure will we see? (Analysis, MA 2.2 G.7/2)

A. Triangle
B. Quadrilateral
C. Pentagon
D. Hexagon

Solution: Hexagon

The cross-section of a right hexagonal pyramid is a hexagon.

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

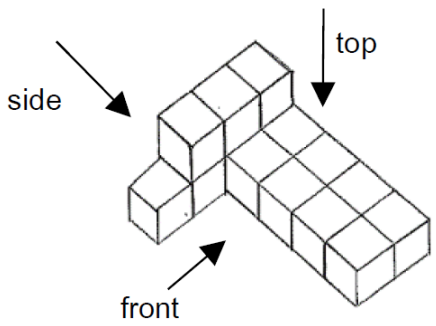

---

4. If we cut a three-dimensional geometric figure vertically, is the cross-section different from the others? (Analysis, MA 2.2 G.7/2)

A. Cylinder
B. Cuboid
C. Square Pyramid
D. Triangular Prism

Solution: Square Pyramid
If we cut a three-dimensional cylinder vertically, the cross-section will be a rectangle.
If we cut a three-dimensional cuboid vertically, the cross-section will be a rectangle.
If we cut a three-dimensional square pyramid vertically, the cross-section will be a **triangle**.
If we cut a three-dimensional triangular prism, the cross-section will be a rectangle.

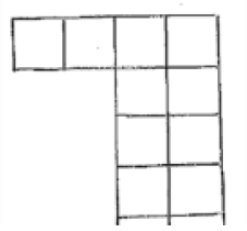

5.

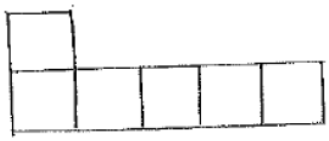

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

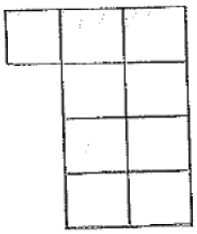

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

Which one is the two-dimensional geometric figure viewed from the front? (Analysis, MA 2.2 G.7/2)

A. 

B. 

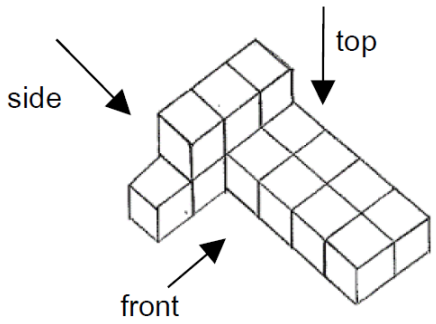

C. 

D. 

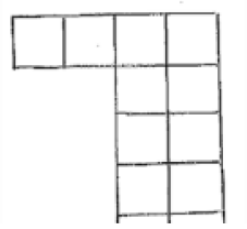

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

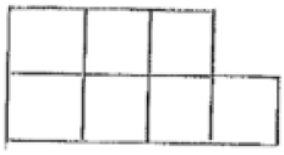

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

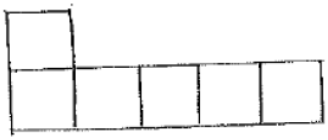

Solutio

6. 

Which one is the two-dimensional geo viewed from the .7/2)

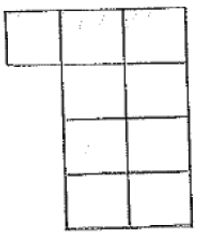

A. 

B. 

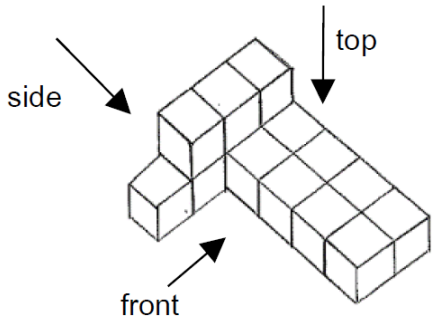

C. 

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

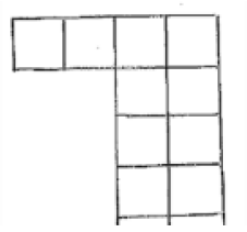

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

D. 

Solutio 

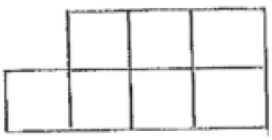

7. 

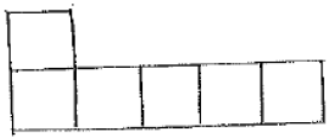

Which one is the two-dimensional geo viewed from the 7/2)

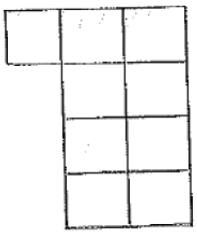

A. 

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

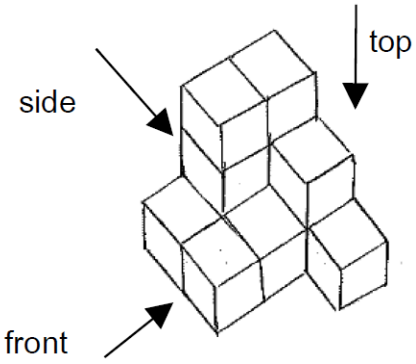

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

B. 

C. 

D. 

Solutio 

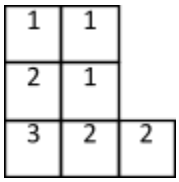

8. 

Which one is the two-dimensional geor viewed from the f nt thickness) ?)

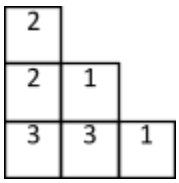

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

Subject Mathematics Semester 1 **Mathayomsuksa 1**
Questions 10

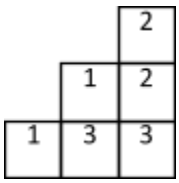

A.

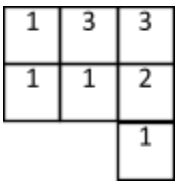

B.

C.

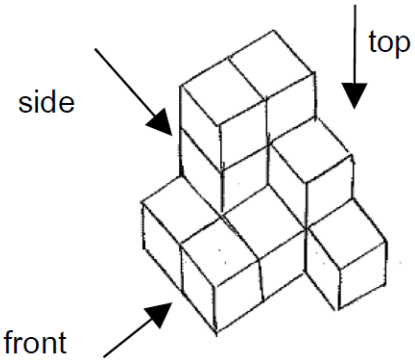

D.

Solution

9.

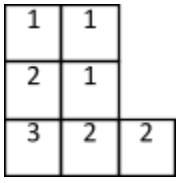

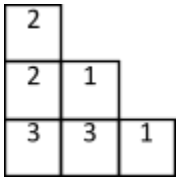

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

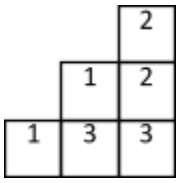

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

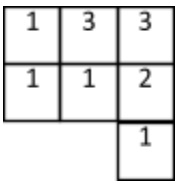

Which one is the two-dimensional geometric figure viewed from the side?(Numbers represent thickness)

(Analysis, MA 2.2 G.7/2)

A. 

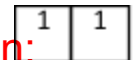

B. 

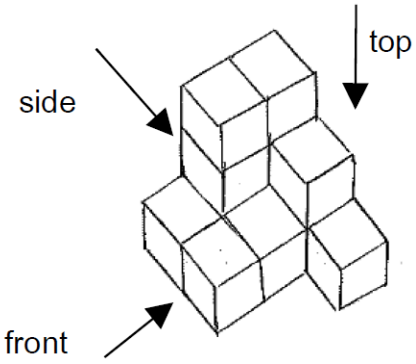

C. 

D. 

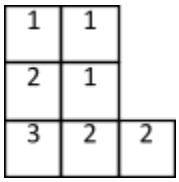

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

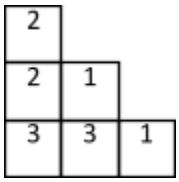

Subject Mathematics Semester 1 **Mathayomsuksa 1** **Questions 10**

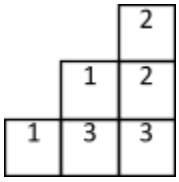

Solution: 

10. 

Which one is the two-dimensional geor viewed from the s t thickness) ?)

A. 

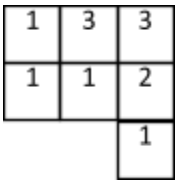

B. 

C. 

Pre-test **Unit Basic 2D and 3D** **Time 10 minutes**

Subject Mathematics Semester 1 **Mathayomsuksa 1**
Questions 10

D.

Solution:
