

## **876GOWE**

I chose the Options/Swing trade Momentum system because I'm going to learn a skill with an expert so I can help my brother with his business.

### **ENTRY PARAMETERS**

From my understanding of the Squeeze Pro indicator I will use one of the three categories to find a squeeze to identify a box then wait for price to move above 9ma and 50ma then finally you want to see price break above the recent highs around the resistance zone once price close above resistance that's my entry signal.

### **EXIT PARAMETERS**

I will get out of long trade if price breaks through 9ma below for short trade i will get out if price break through 9ma.

### **RISK PARAMETERS**

I will risk 1% of my account because I'm thinking about the long run in the business.
