

# Raz- Kids

Here are the directions for using Raz-Kids are home.

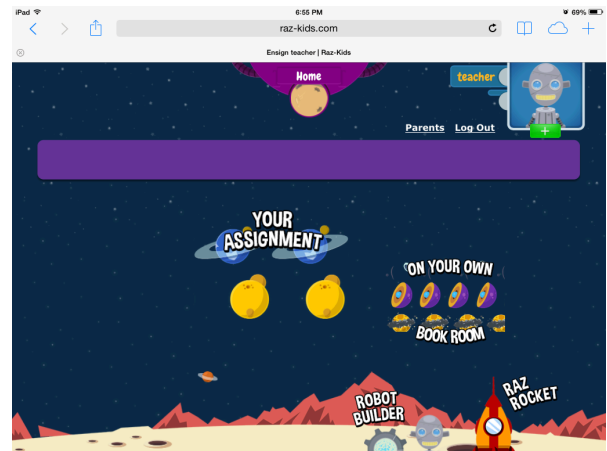

1. Using the Raz-Kids app touch your child's teacher's name.

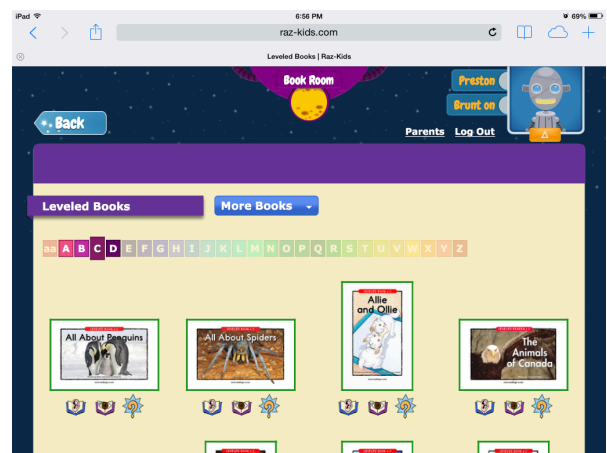

2. Next have have your child find his/her name and touch it.

3. Now, touch the yellow moon that says **On Your Own**

4. You will see the letters at the top of the page. The last letter is the level in which your child is being instructed. Please only read the books that are assigned from that level. If your child wants to read other books, they can read the levels below it. For example, in the pictures the student should only read books from level D that are assigned by the teacher. However,

books from A-C are for free choice.

5. You child should always be using the eyeball icon when reading at home. The question mark icon is for taking the quiz. After your child is done reading the book they need to take the quiz. When they are done, you may review the quiz with them and help them clarify any they missed.
