## **Parent and Guardian Math Resources: Kindergarten**

---

What do Kindergarteners need to know?

What does this look/sound like?

How can I support my child at home?

# Parent and Guardian Math Resources: K

The Arizona Mathematics Standards define the knowledge, understanding, and skills that need to be taught and learned so all students are ready to succeed in credit-bearing, college-entry courses, and/or in the workplace. The Arizona Mathematics Standards are the foundation to guide the construction and evaluation of mathematics programs in Arizona K-12 schools and the broader Arizona community. These standards were adopted by the Arizona State Board of Education in December of 2016.

## Write and Represent Numbers

### Write the number that matches how many objects

[Video: How Many Bears](#)

After counting a group of objects, have your child write the number. They can also use a finger to trace a number while saying the number.

### Different ways to make a number

**Video coming soon**

While driving, while making dinner or as you are walking through a store, ask your child how they can make a number. An example would be, "How can you make 5?" The student should respond with  $3 + 2$ ,  $4 + 1$ ,  $0 + 5$ . Make sure you keep asking for more ways until they have found them all.
