

Introduction

This is a document for people to keep up to date with the latest themes and ROMs during the transition period from Layers to Substratum. Developers/themers, if you want your theme/ROM added to this list and/or to request edit access, please message me on Hangouts (natechancellor@gmail.com) or Telegram (@nathanchance).

Themers: tell me if your app is in beta or not (and try to give me a timeline of when it will exit if so), provide me with a direct download link, and tell me if your theme works with version 170.

ROM devs: give me the following information right off the bat:

- Link to your source (if applicable)
- Link to your Google+ community or XDA thread (if applicable)
- An easy way to find your list of supported devices (list if possible)
- An easy way to find your download links (Google+ is usually sufficient)

Compatible themes

All of the below themes will work with Substratum versions 170+

Name	Price	Color	Channel	Link
Beltz	\$1.50	Black	Stable	Play Store
Biohazard	Free	Black	Stable	Play Store
