Asian Multidisciplinary Research Journal of Economy and Learning

Volume 1, Issue 1, Page 01-06, 2024, Article No. AMJEL.00001

ISSN: XXXX-XXXX

The title should clearly and concisely describe the main focus of the article, using a maximum of 15 words. It should be specific and accurately reflect the content of the study (Arial Bold 24)

Fulan bin Fulan ^{a++*}, (Arial 16), Fulan ^b Fulan^{c#}

^a Department, Affiliation, Province, Country (Arial 10).

^{b,c} Department, Affiliation, Province, Country.

Each author's affiliation should be indicated by a superscript that corresponds with the superscript next to their name

Authors' contributions

This work was carried out in collaboration among all authors. All authors read and approved the final manuscript.

Article Information

DOI: XXXX/AMJEL/2024/XXXXX

Open Peer Review History:

This journal follows the Advanced Open Peer Review policy. Identity of the Reviewers, Editor(s) and additional Reviewers, peer review comments, different versions of the manuscript, comments of the editors, etc are available here:

ABSTRACT (ARIAL BOLD 12)

Provide a concise summary of the study, including the research objective, methods, results, and conclusion. It should not exceed 250 words. (Arial 10)

Keywords: *List 4-6 keywords that represent the main topics of the article. These keywords help in indexing the article and improving its discoverability.*

Cite as

1. Introduction (Arial Bold 12)

Introduce the topic, provide background information, and state the research problem, objectives, and significance. This section sets the context for the study (Arial 10) single and each paragraph is indent 1 cm.

2. Method (Arial Bold 12)

This section should describe the methodology used in the study, providing enough detail for the work to be replicated. It typically includes information on study design, data collection methods, and data analysis techniques.

2.1 (Arial Bold 10)

This subsection should outline the specific analytical methods used to process and interpret the data. It should provide an overview of the statistical or qualitative methods employed to analyze the data

2.1.1 (Arial 10)

This sub-subsection should describe the regression analysis (As an example) conducted in the study. Include details about the type of regression used (e.g., linear, logistic), the variables involved, the model's assumptions, and the rationale behind choosing this specific analysis method. Additionally, mention how the regression model's accuracy and fit were evaluated, such as through R-squared values, p-values, or other relevant metrics

3. Result and Discussion (Arial Bold 12)

3.1 Results (Arial Bold 10)

The "one house one jumantik" program is a national-scale initiative involving multiple stakeholders...

Present the study's findings, including data and analyses. Discuss the results in the context of existing literature and the study's objectives.

3.1.2 Preparation (Arial Bold 10)

The preparation phase involves mapping the locations that need monitoring for mosquito breeding...

Detail the steps taken during the study, including preparation, data collection, and analysis processes.

Use Arial 9 for the text within tables and figures, including titles, labels, legends, and any explanatory notes. This smaller font size helps distinguish these elements from the main body text and ensures that tables and figures are visually compact and clear.

Table 1. The explanation for the table format (center)

Use	Arial 9	bold	For the table header
16	16	16	16
16	16	16	16

Figure Title: The title should be placed below the figure, center-aligned, and in Arial 9. It should succinctly describe the content or message of the figure.

Figure 1. Argael publisher

3.2 Discussion (Arial Bold 10)

The Discussion section should provide an interpretation of the results, discussing their implications, significance, and how they fit within the broader field of study. This section may include comparisons with previous studies, an exploration of the limitations of the current study, and suggestions for future research.

Key Findings (Arial Bold 10)

This subsection should summarize the main findings of the study, highlighting the most significant results. It should provide a concise and clear explanation of the study's outcomes and their relevance.

Comparison with Previous Studies (Arial Bold 10)

This part should compare the study's findings with existing literature. Discuss whether the results align or differ from previous research and explore possible reasons for any discrepancies. Include references to prior studies to provide context.

Implications and Applications (Arial Bold 10)

Discuss the practical implications of the study's findings. This could include potential applications in policy, practice, or further research. Highlight how the results contribute to the field and what new insights have been gained.

4. Conclusion (Arial Bold 12)

The Conclusion section should succinctly summarize the key findings of the study, the implications of these findings, and any recommendations or future directions. It should provide a final perspective on the research topic and its broader context.

Recommendations (Arial Bold 10)

Provide specific recommendations based on the study's findings.

5. References

The References section lists all the sources cited in the article. This section should follow a consistent citation style APA style specified by the journal's guidelines. The references should be formatted with specific details to ensure that readers can easily locate the cited works and recommend to use Mendeley for enhance the clarity of the articles.

Use APA Style and Central Bureau of Statistics [BPS]. (2022). Sail Sub-district in Figures 2021.

Chadijah, S., Rosmini, & Halimuddin. (2011). Increasing community involvement in the implementation of dengue mosquito breeding ground eradication (PSN-DBD) in two Kelurahan in Palu City, Central Sulawesi. *Media Litbang Kesehatan*, 21(4), 183-190.
