

# VicDex User Guide

**VicDex** is a decentralized finance (DeFi) platform on the **Viction** network, allowing you to easily **create pools**, **add liquidity**, **remove liquidity**, and **swap** between VIC and VRC25 tokens.

## Step 1: Set Up MetaMask

Before using **VicDex**, you need to set up **MetaMask** with the **Viction** network and add the **VRC25** token.

### 1.1 Add Viction Network to MetaMask

1. Open **MetaMask** and go to **Settings**.
2. Navigate to **Networks** and select **Add Network**.
3. Enter the following details:
  - **Network Name:** Viction Mainnet
  - **RPC URL:** <https://rpc.viction.xyz>
  - **Chain ID:** 88
  - **Currency Symbol:** VIC
  - **Block Explorer URL:** <https://vicscan.xyz/>
4. Click **Save**.

### 1.2 Add VRC25 Token

1. In MetaMask, go to the **Assets** tab.
2. Click **Add Token** and select **Custom Token**.
3. Enter the **VRC25 token address** (For example, to add the **FROLL token**, the address is **0xB4d562A8f811CE7F134a1982992Bd153902290BC**).
4. Click **Next** and then **Add Tokens**.

## **Step 2: Connect MetaMask to VicDex**

1. Visit the following link to access the **VicDex guide IPFS**:  
<https://ipfs.io/ipfs/bafybeigex3xvwx46rkjzyiu3lvl6ynobdq3zkgga7estff722klzvt4te>
2. Click the **Connect Wallet** button.
3. Choose **MetaMask** and confirm the connection in your wallet.
4. Once successfully connected, you'll see your wallet address and the **Viction** network information on the VicDex interface.

## **Step 3: Create a New Pool**

1. In the VicDex interface, go to the **Liquidity** section.
2. Click **Create Pool** and select the tokens you want to pool (either VIC or a VRC25 token).
3. Enter the amounts of tokens and VIC you want to provide for the pool.
4. Click **Create Pool** and confirm the transaction in MetaMask.

## **Step 4: Add Liquidity**

1. In the **Liquidity** section, select the pool you want to add liquidity to.
2. Click **Add Liquidity** and enter the amounts of tokens and VIC you want to add.

3. Click **Add Liquidity** and confirm the transaction in MetaMask.

### Step 5: Remove Liquidity

1. Select the pool where you added liquidity.
2. Click **Remove Liquidity**.
3. Enter the amount of liquidity you want to remove and confirm the transaction in MetaMask.

### Step 6: Swap Tokens

1. Click **Swap** from the main VicDex interface.
2. Select the tokens you want to **swap** and the amount to convert.
3. Click **Swap** and confirm the transaction in MetaMask.

### Fees & Earnings

- **Transaction Fees** are determined by the pool creator during the pool setup.
- **Earnings** from transactions are distributed to liquidity providers in the pool.

### Tip:

If you prefer not to remember the long link, simply visit **Lottery.vin**, scroll down to the footer, and click the **VicDex** button to be redirected to the official **VicDex guide** link IPFS:
