Present

- * Matteo Collina @mcollina (TSC)
- * Antoine du Hamel @aduh95 (TSC)
- * Beth Griggs @BethGriggs (TSC)
- * Joyee Cheung @joyeecheung (TSC)
- * Darshan Sen @RaisinTen (TSC)
- * Gireesh Punathil @gireeshpunathil (TSC)
- * Richard Lau @richardlau (TSC)

Agenda

Announcements

- OpenJS World is next week
- We are renaming the branch of nodejs/node to main

CPC and Board Meeting Updates

*Extracted from **tsc-agenda** labeled issues and pull requests from the **nodejs org** prior to the meeting.

nodejs/node

- * Revert the change of network interfaces family from string to integer [#43054](<https://github.com/nodejs/node/pull/43054>). Also issue “Revert the change of network interfaces family from String to Integer [#43014](<https://github.com/nodejs/node/issues/43014>)”.
- Antoine is getting some blockers, currently we have to make a choice. Please chime in the issue thread.
- * tools: add `.git-blame-ignore-revs` file [#43017](<https://github.com/nodejs/node/pull/43017>)
- Matteo: how are going to update the file?
- Darshan: We would need to make a PR

- Antoine: Can we contact GitHub support for add an opt-out option for collaborators who don't want the blame to skip commits?

- * Auto closing old stale PRs [#42981](<https://github.com/nodejs/node/issues/42981>)

- Gireesh: why are those PR stale? He would focus on fixing them, closed or anyway triaged.

- * Global `fetch` breaks `source-map` [#42638](<https://github.com/nodejs/node/issues/42638>)

- Matteo pinged Eemeli to see if assembling a release of source-map is possible to close this issue

- * Rename default branch from "master" to "main"

- [#33864](<https://github.com/nodejs/node/issues/33864>)

- Richard: build will take of all the CI tasks, individual devs would need to update their machine.

- Matteo: are you updating also node-private?

- Richard: not really, something would need to be done

- * process: add CLI opt to hide experimental warnings

- [#31000](<https://github.com/nodejs/node/pull/31000>)

- this was managed in the last TSC meeting, we can remove from the agenda.

nodejs/TSC

- * Onboard @juanarbol as security steward [#1233](<https://github.com/nodejs/TSC/issues/1233>)

- one day to go

- * Recertify moderation team [#1231](<https://github.com/nodejs/TSC/issues/1231>)

- no objections

- * End-of-Life dates of Node.js 16 and OpenSSL 1.1.1 do not align

- [#1222](<https://github.com/nodejs/TSC/issues/1222>)

- Confirmed we are shortening the Node v16 LTS lifetime, anything else is a potential breaking change (Richard looked at alternatives).

- Richard is preparing an announcement blog post.

- Add Rafael to Security group <https://github.com/nodejs/TSC/issues/1235>

- Communicated to everybody in the meeting

Strategic Initiatives

Startup performace

- Landed <https://chromium-review.googlesource.com/c/v8/v8/+3616553> to improve memory safety of the custom snapshots but later reverted it due to regressions - working on a reland.

- Also opened <https://bugs.chromium.org/p/v8/issues/detail?id=12921> to discuss about possible solutions to ensure memory safety of read-only snapshots in V8. Continuing work on this issue.

- mkcodecache is gone after <https://github.com/nodejs/node/pull/43023>, the code cache is now part of Node.js's custom snapshot.

Upcoming Meetings
