

Can the Medium be the Message?

Write a paragraph that describes how much the format of the images, stories or films you watched matters. What do the images, camera angles, special effects do to influence the message the viewer receives. Is this more or less influential than reading the original book?

Create your own multimedia version of one of the events in *Frankenstein*. This can be a video, slideshow, collage, audio version, etc. Storyboard your presentation before you begin the actual creation.

Resources: Use the [Research Project Calculator](#) from the Electronic Library of MN to plan out your project. There are guides for citing your sources if you need them if you use images and for storyboarding, script writing and creating visuals.
