Subject: Here is how you access your Nomad plan!
To: <radicalfox1@gmail.com>

How to Install your Nomad eSIM

Hi there,

Thanks for your purchase of your Regional Middle East - 30 Days - 10 GB plan!
You can find your order confirmation in the attachment.

Now here's how you get connected! **Make sure you're connected to Wi-Fi or have stable data connection.**

QR Code Installation

1. Scan the QR code above to install the eSIM on your device (note, on some Android devices, you can't use the camera app to scan the QR code. Check out the detailed installation guide below instead)
2. Activate / Start your eSIM when you are ready to use data. **Note that some eSIMs are activated / started differently. This eSIM is automatically activated / started once you connect to the local network at your destination**
3. Please check the [iOS guide](#), [General Android guide](#) or [Samsung guide](#) if you require more detailed instructions

The expiry of the plan will not start until the data plan on your eSIM is activated / started.

Manual Installation

If you are experiencing issues with the QR code, you can try installing manually. Please follow the guide and enter the following when prompted:

IOS

SM-DP+ Address:rsp.truphone.com

Activation Code:JQ-1227TW-ZMZBRX

Android

Code:LPA:1\$rsp.truphone.com\$JQ-1227TW-ZMZBRX
