Phone number: +7 916 252 69 99

Address: Moscow, street Moskvitina, building 1, house 9

About me:

It is always important for me to achieve a high quality of the application. So that users have a minimum number of problems when using the application, but also so that developers can write code conveniently and quickly.

I am a member of the program committee of the Mobius mobile conference. I try to always be in the trend of new technologies and help the speakers to bring their report to the end.

Technical skills:

Languages: Objective-C, Swift, Groovy, Python, Ruby, Bash, Kotlin.

Databases: SQLite, MongoDB

Development Software: Xcode, Android Studio, SourceTree, Figma, Postman

Technologies: RESTful web services, GRPC, ELK, RxSwift, CoreData, AutoLayout, SnapKit, SPM.

Work Experience:

Senior iOS Developer & Cross Chapter Lead, M2

Dates: 02/2020 - Present

- Development of the application from scratch, participation in the design of the application architecture, planning of product and technical tasks for the quarter.
- Creating a cross-platform CI / CD using Swift and Kotlin. Release process automation and creation of automated UI tests to test critical business scenarios.
- Setting up and developing network monitoring to track errors and problems. Collection and visualization of application technical metrics, such as: application build time, application size in the App Store, and etc.
- Development of cross competencies within the chapter, sharing of knowledge between platforms.
- Close cooperation with the analytical department and the marketing department, implementation of analytical libraries, such as: Firebase Analytics, AppsFlyer, Facebook.

iOS Developer, Sberbank

Dates: 08/2017 - 01/2020

- Took part in the development of product functionality, participated in communications with backend developers and designers, prepared functional requirements for the vendors' library.
- Was a member of the platform team, which was responsible for the quality of the application and the development of internal components for all developers of the company.
- Development and support of CI / CD and an internal dependency manager written on the basis of Carthage.
- Mentoring new hires and conducting technical interviews.
- Critical bug fixes and crash free support at a high level.

Education:

MEPHI, Moscow Engineering Physics Institute
Specialist, 2013-2019

Publications and Conferences:
