Kerala, the tiny state on India's southwest coast, is the one hotspot of COVID remaining in India. Kerala led India on August 25, 2021, with 31,445 of its 46,265 new infections. With no Ivermectin use, Kerala has some 34 million people, making their infection rate nearly one in one thousand. This rate is far higher than Uttar Pradesh, India, at closer to one in eight million, where Ivermectin is widely used.

[India's Ivermectin Blackout - Part V: The Secret Revealed | Columnists | thedesertreview.com](#)

Uttar Pradesh also handed out home kits (cost \$2.65 each). Each home kit contained the following: Paracetamol tablets [tylenol], Vitamin C, Multivitamin, Zinc, Vitamin D3, Ivermectin 12 mg [quantity #10 tablets],

Doxycycline 100 mg [quantity #10 tablets]. Other non-medication components included face masks, sanitizer, gloves and alcohol wipes, a digital thermometer, and a pulse oximeter.

[Gaslighting Ivermectin, vaccines and the pandemic for profit | Columnists | thedesertreview.com](#)

The gaslighting today on Ivermectin is brighter than the sun. If you stood to make billions and could get the media to do your bidding, and you needed to demonize a safe and effective solution that would put an end to the Pandemic - and your profits, what would you do?

Its use in African countries:
