School: -

Type: Pro

Team Name: CIN/Peoria

Bats: R

Class: -

Date of Birth: 06/17/04

Throws: R

Elig Yr: -

OFP: 55

2

Height: 5'10

Games: 1

Weight: 185

Innings: 9

Hit Type: Str Away

Report Date: 10/18/25

Scout: M. Johnson

Stance/Hit Approach: Straight up stance with hands by his shoulders. Balanced approach. Medium stride.

Physical Description: 5'10, 185 lb small but built frame.

ML Comparison:

Category	Present	Future	Comments
Hitting Ability *	45	55	Good timing and bat speed. Will stay balanced, on plane and drive balls to all parts of the field.
Plate Discipline	45	50	Will occasionally chase fastball up and BB away but has improved his walks and cutdown on strikeouts this year. Has the potential to be at le
Power Frequency *	40	45	Doesn't lift the ball. Mostly a doubles line drive hitter.
Raw Power	40	45	Gap to Gap hitter. Good enough bat speed and sneaky strength to run into a few homeruns.
Running Speed *	50	50	Light on his feet with short strides.
Base Running	40	45	Picked off when he wasn't expecting it. Below average but capable.
Arm Strength *	55	55	Has plenty of arm strength to stick at SS.
Arm Accuracy	55	55	Accuarate throws from different parts of the field.
Fielding *	50	55	Quick first step with soft hands at multiple positions. Gets rid of the ball quickly and sets his feet. Fluid actions. Not very flashy.
Range	50	50	Avg lateral mobility.
Baseball Instincts	60	60	Advanced awareness and lets the game come to him
Aggressiveness	50	50	Ballplayer who wants the ball coming to him

Summation: Everyday shortstop who makes all the necessary throws and has the bat speed and timing to impact the game at the plate. He's a true ballplayer who is consistently involved in plays, shows strong instincts, and is always in the right position. His actions are fluid and his above-average arm allows him to handle all throws from shortstop. Offensively, he does the most damage with a line-drive approach and can use the entire field. He has average speed and will need continued development as a baserunner.

PITCHER

Report #: 1
Instructor: Garry Templeton II

Player: Marcelo Perez Pos: RHS School: Texas Christian City, ST: Laredo, TX Type Pro
Team Name: SEA/Peoria Bats: R Class: -
Date of Birth: 11/16/99 Throws: R Elig Yr: - OFP: 35
Wind-Up: SET Height: 5'10 Games: 1
Arm Angle: 3/4 Weight: 195 Innings: 1
Arm Action: Fair Report Date: 10/15/25
Delivery: Fair Scout: Matt Johnson

Arm/Delivery Mechanics: Smooth repeatable delivery, nothing too flashy. Average knee lift. Legs and hands in synce as he lifts. Below average extension.
Physical Description: Average build at 25 years old. Probably wont get much stronger due to his age and maturity level. ML Comparison: _____

Category	Present	Future	Velocity	Comments
Fastball *	40	40	89-91	Below average fastball velocity. Gave full effort with slight head whack.
FB Movement	40	40		Was able to see it well out of the hand. The fastball looked straight with not much ride and wasn't able to consistently throw it to his glove side.
Curve *	-	-		
Slider *	35	40	79-84	Sweeper has inconsistent movement and location on the mound. Not a true out pitch unless he can command it better.
Other *	45	45	85-89	Threw a shorter slider with gyro-like movement. Was able for a strike but not command it. Looked to use it early in counts to set up sweeper.
Change	40	40	84-85	Wasn't giving same effort throwing the change than with the FB. Ran and flattend out.
Command	30	30	-	Didn't know where the ball was going, was just trying to get it over the plate.
Control	35	40	-	Could throw a get me over pitch but threw a lot of his 25 pitches out of the zone in 1/3 inning. Can't throw pitches on the inside part of the plate.
Baseball Instincts	-	-	-	
Aggressiveness	40	40	-	Not very aggressive. Frequently tried to nibble around the edges of the zone instead of attacking.

Summation: Profiles as an organizational depth starter with below-average stuff and inconsistent control. At 25 there may not be much physical projection or time left to fully iron out the command issues. The delivery was fairly repeatable with some late deception out of his arm slot, but the fastball was below average with limited ride and he struggled to locate it to all quadrants. He could land the shorter slider for strikes, but the sweeper command was loose and unpredictable. He pitched more finesse than power, yet lacked aggressiveness—often nibbling at the corners instead of attacking hitters. Will need significant improvements in command and pitch quality to remain viable at upper levels.

PITCHER

Report #: 2
Instructor: Garry Templeton II

Player: Alex Amalfi Pos: RHS School: Massachusetts-Boston City, ST: Ashland, MA Type Pro
Team Name: TOR/Glendale Bats: R Class: -
Date of Birth: 2/18/01 Throws: R Elig Yr: - OFP: 45
Wind-Up: Set Height: 6'1 Games: 1
Arm Angle: H3/4 Weight: 185 Innings: 3
Arm Action: Fair Report Date: 10/15/25
Delivery: Fair Scout: Matt Johnson

Arm/Delivery Mechanics: Fluid delivery with not much deception. Keeps his hands close to his belt. Shouldn't have any trouble repeating delivery. Gets above average extension. Minimal head whack.

Physical Description: 6'1 185 pound medium build with a narrow waist. Has room to get stronger in his build. ML Comparison:

Category	Present	Future	Velocity	Comments
Fastball *	50	50	91-93	Fastball sat at 92 mph. He has the frame to add strength, which could lead to increased velocity. Fastball hit around frequently.
FB Movement	45	45	-	Straight with a decent amount of ride. Is able throw it to both sides of the plate.
Curve *	35	45	73-74	11-5 downer with good depth and loose movement. Has trouble commanding pitch by leaving it up in the zone. Needs to get it down more so hitters don't do damage on it.
Slider *	50	55	82-85	Gyro slider that was his true out pitch. Gets lifty at times but makes hitters uncomfortable with it.
Other *	-	-	-	
Change	45	50	82-84	Used pitch to change speeds and keep hitters off balance. Had run with a little bit of depth. Inconsistent at times and could straighten out and get flat.
Command	35	40	-	Often couldn't locate his pitches in zone.
Control	40	45	-	Inconsistent in his strike throwing.
Baseball Instincts	50	50	-	Knew where to be and how to field his position when balls hit in the infield. Knew the curveball wasn't working for him so he started to throw it less.
Aggressiveness	50	50	-	Not afraid to throw all 4 pitches to righties and lefties.

Summation: #5 starter who has enough stuff to get outs but lacks the command to be consistent. Amalfi works out of the stretch and has a consistent no nonsense delivery with a medium build and a 4 pitch mix. He's able to get his stuff over the plate but has inconsistent movement and ability, leading to too many mistakes left over the heart of the plate. He won't overpower hitters, but has just enough feel and sequencing ability to compete when he's locating. Has the arsenal to stick as a back-end starter if he can sharpen command and limit mistakes in the zone.

PITCHER

Report #: 3
Instructor: Garry Templeton II

Player: Michael Fowler Pos: RHR School: Southern Mississippi City, ST: Birmingham, AL Type Pro
Team Name: MIL/Surprise Bats: R Class: -
Date of Birth: 7/23/02 Throws: R Elig Yr: - OFF: 50
Wind-Up: SWU Height: 6'3 Games: 1
Arm Angle: 3/4 Weight: 205 Innings: 2
Arm Action: Good Report Date: 10/16/25
Delivery: Fair Scout: M. Johnson

Arm/Delivery Mechanics: Delivery doesn't aid in deception. Keeps hands close to his chest as hes delivering from the windup. Medium leg lift. Stabs the ball with a whip like arm action.
Physical Description: 6'3, 205 sturdy build, slanted shoulders, long legs. ML Comparison:

Category	Present	Future	Velocity	Comments
Fastball *	60	60	95-97	Sat at 96. Quick arm, fastball jumps at the plate.
FB Movement	50	55	-	Plenty of carry with minimal run.
Curve *	50	55	80-83	Slurvy action with late break.
Slider *				
Other *				
Change				
Command	35	40	-	Was just trying to get it to the plate.
Control	40	45	-	Full effort with head whack leads to inconsistent accuracy to the mound.
Baseball Instincts				
Aggressiveness				

Summation: Solid set up relief pitcher with 2 above average pitches and shaky command. Throws with full effort and agressiveness which leads to being a little eratic on the mound. Plus fastball that jumps out of the hand, sitting at 96 mph with good extension. Curveball has a sharp break with slurvy type action that gets outs. Has the stuff to pitch in leverage spots but refinement of command will determine his ceiling.

PITCHER

Report #:4

Instructor:Garry Templeton II

Player: Eiberson Castellano

Team Name: PHI/Surprise

Date of Birth: 5/9/25

Wind-Up: Set

Arm Angle: 3/4

Arm Action: Good

Delivery: Good

Pos: RHS

Bats: R

Throws: R

Height: 6'3

Weight: 221

School: -

Class: -

Elig Yr: -

Games: 1

Innings: 3

City, ST: Maracaibo, Venezuela

Type: Pro

OFP: 50

Report Date: 10/18/25

Scout: M. Johnson

Arm/Delivery Mechanics: Keeps glove close between the chest and belt as he delivers with a medium but aggressive leg lift. Good extension. Not a lot of deception with his delivery. Good arm action.

Physical Description: 6'3, 221 right hander with a sturdy body and square shoulders. Probably won't add much more strength.

ML Comparison:

Category	Present	Future	Velocity	Comments
Fastball *	55	60	92 - 94	Sitting at 93 but has touched 98 this summer so the velocity is in there.
FB Movement	40	45	-	Very straight with minimal ride or run.
Curve *	55	60	81-83	True out pitch. Has good velocity on it with sharp ending break and good depth. Can throw it in and out of the zone.
Slider *				
Other *	35	40	84 - 86	Calls it a cutter but it has more glove side lateral movement at times. Movement is inconsistent.
Change	45	50	87-88	Good amount of arm side fade. Uses same arm speed as fastball. Can flatten out at times.
Command	45	50	-	Has a hard time locating the fastball at times and the curveball is good enough to play in the zone but he generally throws it down.
Control	50	55	-	Works in and out and can throw every pitch to both sides of the plate. Isn't fine with it.
Baseball Instincts				
Aggressiveness	50	50	-	Gave up a homer and not afraid to go right back to the same spot with the next hitters.

Summation:

Castellano projects as a back-end (#4/5) starter with two plus pitches and average control/command. A former reliever, he transitioned to a starting role in 2024 and is still developing pitchability as he logs more innings. In just his second season as a starter, he's using the AFL to build workload and stamina, which could help him unlock additional fastball velocity.
His cutter can be erratic with "slutter" action, but it provides a different look off the fastball. His curveball is a true plus pitch with power and depth, and he shows the confidence to use it against both righties and lefties. Castellano has the stuff to move quickly, but his overall ceiling is limited by inconsistent command of his secondary pitches.

PITCHER

Report #: 5
Instructor: Garry Templeton II

Player: Tucker Musgrove Pos: RHR School: Mobile City, ST: Mobile, AL Type: Pro
Team Name: SD/Peoria Bats: R Class: -
Date of Birth: 2/1/02 Throws: R Elig Yr: - OFF: 55
Wind-Up: Set Height: 6'2 Games: 1
Arm Angle: 3/4 Weight: 175 Innings: 1
Arm Action: Good Report Date: 10/19/25
Delivery: Good Scout: M. Johnson

Arm/Delivery Mechanics: Starts in the set position. 3/4 arm slot. A lot of effort throwing the ball with average deception.

Physical Description: Good build with long legs and sloped shoulders.

ML Comparison:

Category	Present	Future	Velocity	Comments
Fastball *	60	60	96-98	Firm pitch. Gets good extension with it.
FB Movement	50	55	-	Gets good ride and run on the pitch. Gets a lot of IZ whiff but doesn't throw it in the zone a lot.
Curve *				
Slider *	50	55	84-86	Late break with good sweeping action. He has a hard time controlling it sometimes with that much break.
Other *				
Change				
Command	40	45	-	Has trouble commanding BB in the zone.
Control	50	55	-	Is able to throw the ball over the plate but has a tendency to throw over the middle of the plate.
Baseball Instincts				
Aggressiveness				

Summation: Back end reliever with 2 plus pitches and average control/command. Musgrove has a fastball that sits 97 with a ride/run combo. The slider is firm with late break. He's able to throw the fastball to both sides of the plate but has a tendency to throw down the middle. The command will hurt him but with above average stuff and pitchability, he should move up in the organization quickly.

POSITION PLAYER

Report #: 1

Instructor: Garry Templeton II

Player: Alfredo Duno

Pos: C

School: -

Type: Pro

Team Name: CIN/Peoria

Bats: R

Class: -

Date of Birth: 01/07/06

Throws: R

Elig Yr: -

OFF: 55

2

Height: 6'3

Games: 1

Weight: 248

Innings: 9

Hit Type: Pull

Report Date: 10/15/25

Scout: Matt Johnson

Stance/Hit Approach: Slightly open, athletic stance with a pronounced leg kick that helps him generate significant lower-half power.

Physical Description: Big bodied stout catcher with not much more room to grow in his 6'2 frame.

ML Comparison:

Category	Present	Future	Comments
Hitting Ability *	40	45	Has good timing on the fastball but looked under plane in his swing which could lead to some swing and miss in his game. Bat stayed in zone a long time.
Plate Discipline	45	50	Good swing decisions throughout his AB's. Aggressive on pitches he like in the zone.
Power Frequency *	45	55	Consistently has hard contact off the bat, driving the ball to the gaps.
Raw Power	50	60	Did not get to see BP but had plus bat speed with an uppercut swing.
Running Speed *	35	35	Did not get a run time on him but looked slow down the line.
Base Running	-	-	Did not see.
Arm Strength *	55	55	Arm over quickness to second base. Clocked him at a 1.96 throw down to second based in between innings. Above average arm.
Arm Accuracy	50	50	Only saw him throw between innings down to 2nd but had accurate throws each time.
Fielding *	50	50	As a bigger catcher, he was still able to move behind the plate. Average framing but at age 19 he still has time to get better.
Range	45	45	Can move behind the plate for a big guy.
Baseball Instincts	50	50	Back picked the runner at first.
Aggressiveness	50	50	Aggressivley swings at his pitches to do damage.

Summation: 19 year old power bat catcher who has an above average arm and is athletic enough to stay behind the plate; could move to 1B with the power potential if need be. He controls the strike zone well and shows the ability to be selectively aggressive when he gets a pitch he can drive. He possesses plus bat speed and creates loud contact, with the ball jumping off his barrel. His timing is generally good, though he can get under the ball at times when selling out for power. Defensively, Duno moves surprisingly well for his size, though he likely won't get more agile as he matures physically. His above-average arm strength should help him control the running game and allow him to compensate if added weight impacts his mobility over time. If his bat continues to progress and he maintains enough agility to stay behind the plate, Duno has the tools to develop into a productive everyday catcher with impact power.

POSITION PLAYER

Report #: 2
Instructor: Garry Templeton II

Player: <u>Jim Jarvis</u>	Pos: <u>2B</u>	School: <u>Alabama</u>	Type: <u>Pro</u>
Team Name: <u>ATL/Scottsdale</u>	Bats: <u>L</u>	Class: <u>-</u>	
Date of Birth: <u>11/06/00</u>	Throws: <u>R</u>	Elig Yr: <u>-</u>	OFP: <u>50</u> 2
	Height: <u>5'10</u>	Games: <u>1</u>	
	Weight: <u>190</u>	Innings: <u>9</u>	
Hit Type: <u>Pull</u>		Report Date: <u>10/15/25</u>	
		Scout: <u>Matt Johnson</u>	
Stance/Hit Approach:	Stands upright with a slightly open stance and keeps his hands tight to the body. Shows a controlled approach with a longer stride into the ball.		
Physical Description:	5'10", 190-pound frame with a slender build and room to add strength.		ML Comparison: _____

Category	Present	Future	Comments
Hitting Ability *	45	50	Able to hit the ball to all parts of the field. Makes contact with the ball more often than not. Gets a little lify with the ball in his approach. Need
Plate Discipline	50	55	Had the ability to lay off good pitches outside and has the ability to be selectively aggressive for his pitch.
Power Frequency *	40	45	Ball doesn't jump off the bat when he hits it in the air. Higher exit velocities when hits line drives and ground balls.
Raw Power	40	45	Long hinge and uppercut swing. More power from the pull side. Would like to see him take more of a line drive approach.
Running Speed *	45	45	Clocked him at 4.26 to first from the left side.
Base Running	50	50	Had good secondary leads.
Arm Strength *	55	55	Saw him take groundballs at second and zipped the ball from all angles of his body.
Arm Accuracy	50	50	Was able to get the ball in the right spot during routine groundballs.
Fielding *	55	55	First step at the position was slow but had soft hands and fielded the ball cleanly.
Range	50	50	Has the ability to get to the routine play.
Baseball Instincts	-	-	
Aggressiveness	60	60	Agressively swinging early in at bats at fastballs.

Summation: Utility infielder who has the range and arm strength to play anywhere in the infield. His slender frame hints at possible strength gains, but at 24 and already in Triple-A, there may be limited power projection remaining. He sprays the ball to all fields with his best impact to the pull side. Primarily a contact hitter with a good feel for the strike zone and consistent bat to ball.

POSITION PLAYER				Report #:	3
				Instructor:	Garry Templeton II
Player: <u>Charlie Condon</u>	Pos: <u>1B</u>	School: <u>Georgia</u>	Type: <u>Pro</u>		
Team Name: <u>COL/Salt River</u>	Bats: <u>R</u>	Class: <u>-</u>	Elig Yr: <u>-</u>	OFF: <u>50</u>	2
Date of Birth: <u>04/14/04</u>	Throws: <u>R</u>	Height: <u>6'6</u>	Games: <u>1</u>		
	Weight: <u>216</u>	Innings: <u>9</u>			
Hit Type: <u>Pull</u>				Report Date: <u>10/16/25</u>	Scout: <u>Matt Johnson</u>
Stance/Hit Approach:	Wide base, toe tap, small stride, keeps hands back as he strides forward. Minimal movement pre pitch. Slightly open stance.				
Physical Description:	Tall muscular build. Long arms and legs.			ML Comparison: _____	

Category	Present	Future	Comments
Hitting Ability *	40	50	Pull side hitter with a a level swing. Good bat to barrel skills.
Plate Discipline	50	50	Chases on fastballs up in the zone. Makes solid contact on pitches in the zone.
Power Frequency *	50	-	Power is there but only saw him hit the ball on the ground.
Raw Power	60	60	Plus bat speed with strong hands.
Running Speed *	20	20	Clocked him at 4.60 trying to beat out the ball to first.
Base Running	30	30	Hard time reading balls on FO's/LO's, had a hard time knowing when to advance.
Arm Strength *	-	-	Did not see.
Arm Accuracy	-	-	Did not see.
Fielding *	45	45	Able to stretch out and make plays on offline throws with his big body. Reaction time is slow. A little clunky around the bag.
Range	40	40	Looked clunky over at first base with minimal range.
Baseball Instincts	50	50	Didn't have instincts on the basepaths enough to advance on balls that dropped.
Aggressiveness	50	50	Is aggressive at swinging at pitches up in the zone. Not aggressive on the basepaths or defensively.
Summation: Big bodied pull-side power hitter with enough of bat to ball skills to be an above average hitter at the major league level, despite still figuring out his position. Condon has played in the OF in the past but has been playing 1B recently. Didn't see arm play, but with limited speed, 1B seems like a good fit. Has enough range and athleticism for the first base position. If he can continue making strides hitting the ball, he will have enough power to stay at 1B in Colorado.			

Adam Serwinowski Scouting Report

DOB: 7/7/04 (19) | POS: LHP | Bats: L | Throws: L | Height: 6'5 | Weight: 204 | School: Eastside HS

	Org Rank	Last Updated
BA	#12	8/16/25
FG	#7	9/19/25
MLB	#13	9/19/25

	IP	H	R	ER	BB	SO
Pitching Lines						
Games Attended						

Tool	Present	Future	Command	Velo	Comments
------	---------	--------	---------	------	----------

Fastball	55	60		95-97	Fastball sits 95-97. Has no problem elevating the fastball to change hitters eye level. He still has room to grow physically which indicates the potential to throw even harder in the future.
Slider	55	65			He has a sweeping breaking ball with a good finish to it that he throws in the low 80's. He has the ability to get a lot of swing and misses from his breaking ball and it has the potential to be his best pitch.
Changeup	35	45			Serwinowski throws a seldom used Changeup to keep hitters off balance. It has a good amount of downward movement and has the potential to be at least average with more use
Control/ Command	40	50	-		The knock on him is his lack of control on his pitches. In the 2 games I saw him start I was pleasantly surprised with the ability to command the fastball and breaking ball. He was hitting his targets with both his fastball and slider for the first couple of innings. It was concerning that he couldn't command his pitches as well for the last half of his starts. He showed flashes of hitting his spots in the zone which tells me he has the potential to be at least average in this category.
Agressiveness/ Pitchability	45	55	-		Was aggressive early in counts and was able to mix his pitches well to get hitters out.

		Summary			
Adam Serwinowski was a 15th rounder in the 2022 draft for the Cincinnati Reds. He is a big, tall lefty that still has room to fill out physically and add more strength to an already impressive frame. He had very little experience pitching before he made his debut in 2023. He had an impressive 2023 stat line for being so raw. The big knock on him is his control/command but in the 2 games I saw him start, he was better than expected. His fastball sat 95-97 for most of the game. The breaking ball sat in the low 80's with some slurve action. He was able to throw both of these pitches for strikes and get outs with them. The development of his changeup and the ability to command his pitches will ultimately be the deciding factor whether he can be a starter or not. Regardless he can be a fireball lefty out of the bullpen.					

		One Liner			
Tall, raw lefty with impressive velocity and potential, but his future as a starter depends on developing better control, command, and a reliable changeup.					

Carlos Sanchez Scouting Report

Report Date: 2023

Position: SS/2B **Bats/Throws:** L/R

Height: 6'0" **Weight:** 177 lbs

Date of Birth: 1/12/2005 (19 years old)

Current Team/Affiliate: Reds/ACL

Position: 3B/COF

Physical Descriptors

- Physical Description: Athletic body that has room to fill out and add more strength.
- Stance/Load: Open Stance.

Tools (Present / Future)

- Hitting Ability:
 - Present: 40
 - Future: 50
 - Comments: Advanced approach to the plate. He has a good eye even on borderline strike calls with an ability to recognize pitches very well. Sanchez also makes solid contact with a line drive approach and can hit the ball to all parts of the field.
- Plate Discipline:
 - Present: 50
 - Future: 55
 - Comments: K% / BB%
- Power:
 - Present: 40
 - Future: 50
 - Comments: Sanchez hasn't hit for much power yet, but with a frame that is able to put on muscle and the ability to make hard contact, I think he will grow into his power.
- Field:
 - Present: 45
 - Future: 50
 - Comments: Didn't see many balls hit his way, but he had no problem getting in front of the ball and making plays when they did.
- Arm Strength:
 - Present: 45
 - Future: 50
 - Comments: Not the strongest arm, but it's enough to be able to stick at third base or in the outfield.
- Arm Accuracy:
 - Present: 45
 - Future: 50
- Running Speed:
 - Present: 40
 - Future: 45
 - if needed.
 - Comments: He is average on the basepaths but has enough speed to play outfield

Summary

Carlos Sanchez is a left-handed hitter with an open stance. He brings an advanced approach to the plate. I saw him for four ACL games in the summer of 2023, where he had a very good eye, drawing walks in 50% of his plate appearances. He's able to recognize pitches and make a lot of hard contact as well. Although he hasn't hit for much power yet, I think he will once he fills his frame out more. He looked athletic at third base, and with an above-average arm, he should be able to stay there if the bat comes along. I also believe he would do well in an outfield corner spot.

Christian Olivo Scouting Report

Report Date: 2023

Position: SS/2B

Bats/Throws: R/R

Height: 5'9"

Weight: 168 lbs

Date of birth: 8/29/2003

Current Team/Affiliate: Cubs/ACL

Future Position: 2B

Physical Descriptors

- **Physical Projection:** Remaining Average

- **Stance/Load:** Bent Knees, slightly open stance. Smooth pre-pitch load with a toe tap.

- **Athleticism/Body Control:** Good

Tools (Present / Future)

- **Hitting Ability:**

- **Present:** 35

- **Future:** 40

- **Comments:** Opposite field hitter who hits balls mainly on a line or on the ground with a consistent, level bat path. His smooth pre-pitch load leads to calmness at the plate. He needs to recognize pitches better to stay on time with the fastball.

- **Plate Discipline:**

- **Present:** 30

- **Future:** 35

- **Power:**

- **Present:** 25

- **Future:** 30

- **Comments:** A guy who won't have a lot of power. Depending on how much muscle he adds, he could add a little more extra-base hits.

- **Field:**

- **Present:** 55

- **Future:** 60

- **Comments:** Good instincts up the middle with a quick first step and the ability to get in front of the ball. Overall, an above-average fielder.

- **Arm Strength:**

- **Present:** 45

- **Future:** 50

- **Comments:** Average arm that profiles better at second base.

- **Arm Accuracy:**

- **Present:** 50

- **Future:** 55

- **Running Speed:**

- **Comments:** Shows off good speed on the basepaths and in the field. Tracks the ball quickly to make the play.

Summary

Christian Olivo is a defense-first shortstop with nice instincts in the field. With a below-average arm, I think he is more suited for second base. Even with good speed and a solid glove, he doesn't project to be in an everyday MLB lineup due to a lack of power and ability to get on base to use his speed.

Anderson Brito Scouting Report

Position: RHP **Bats/Throws:** R/R **Height:** 5'10" **Weight:** 165lbs
Date of Birth: 7/7/04 **Current Team/Affiliate:** Astros Low-A Affiliate **Age:** 20 years old

Pitching Line (Games Attended: 1)

- **Innings Pitched (IP):** 4.2
- **Hits (H):** 1
- **Runs (R):** 0
- **Earned Runs (ER):** 0
- **Walks (BB):** 2
- **Strikeouts (SO):** 4

Physical Descriptors

- **Physical Projection:** Remaining Average
- **Arm Slot:** H3/4
- **Athleticism/Body Control:** Great
- **Head Whack:** Obvious
- **Delivery (Deception):** No Impact
- **Front Side Deception:** No Impact
- **Perceived Effort Level:** High

Tools (Present / Future / Command / Velocity / Control Zone)

- **Fastball:**
 - **Present:** 55
 - **Future:** 60
 - **Command:** 40
 - **Velocity:** 94-97 mph (peaked at 95 mph)
 - **Comments:** Started strong but tailed off in later innings; velocity dip shows fatigue.
- **Slider:**
 - **Present:** 45
 - **Future:** 55
 - **Command:** 40
 - **Velocity:** 87 mph
 - **Comments:** Legitimate pitch with late break, but inconsistency shows up in middle innings.
- **Changeup:**
 - **Present:** 40
 - **Future:** 45
 - **Command:** 35 ◦ **Comments:** Below average; needs to be kept lower in the zone. Lack of command hurts its effectiveness.
- **Control:**
 - **Present:** 35
 - **Future:** 45
- **Command:**
 - **Present:** 35
 - **Future:** 40

Summary

Anderson Brito, a 20-year-old right-hander for the Astros' Low-A affiliate, showed flashes of potential, particularly with his fastball-slider combination, which could make him a solid reliever in the future. His fastball was dominant early, sitting 96-97 mph, though it dipped as the game went on. The slider has good, late movement but needs more consistency. The changeup is currently below average, with little movement and command issues when left up in the zone. **For Brito to stick as a starter, it is crucial that he develops and commands at least two secondary pitches consistently within the strike zone.** More work on these secondary pitches and building stamina will be crucial for his development.

One-Liner

20-year-old athletic righty with a big arm, command and control issues, but lots of upside

Notes on Pro players (2023)

Mason McGwire

Position: RHS

Bat/Throw: R/R

Height/Weight: 6-4/190lb

Team: Chicago Cubs (ACL)

Born: January 5, 2004 (Age: 20)

Summary: Standing at 6'4, 190 lbs., McGwire has a slender wiry frame that has plenty of room to grow. He throws a fastball in the low to mid 90's along with a slider and splitter combo that look similar out of the hand. McGwire has a quiet demeanor that seems to take direction well from coaches. He is still very raw and learning how to pitch. If he can add more muscle, the hope is that he can add a few ticks to his fastball. The splitter has shown flashes to be a true out pitch for him. I think it will take time, but if he matures and fills his frame out, he can be a good starting pitcher prospect in the organization.

Alexis Hernandez

Position: SS/2B/3B

Bat/Throw: R/R

Height/Weight: 6-0/ 155lb

Team: Chicago Cubs (ACL)

Born: December 27, 2004 (Age: 19)

Summary: Alexis Hernandez has a long and lean frame with a lot of room to fill his frame out. He can make a lot of contact with glimpses of power. If he can add more loft to his swing and put on more muscle without adding to the strikeout percentage, then I believe he will be able to hit for a decent amount of power in the future. He is an average runner for his size. He has played all over the infield with a lot of time coming at second base to make room for other players. I believe he has enough range and arm strength to stick at shortstop or move to third base if he outgrows the position.

Alexander Johnson

Position: RHR

Bat/Throw: R/R

Height/Weight: 6-6/220lb

Team: Cincinnati Reds (ACL)

Born: July 2, 2000 (Age: 23)

Summary: Big imposing figure on the mound with a hard fastball that sits in the mid 90's. He has a good frame and a quick arm with a little deception to his delivery. His control can be inconsistent at times. Johnson has a slider and changeup to go along with the fastball.

2024 Draft Amateur Reports (summaries)

Mike Sirota Scouting Report (2024)

DOB: 20 | POS: CF | Bats: R | Throws: R | Height: 6'2 | Weight: 180 | School: Northeastern

Summary: Sirota is a toolsy center fielder with power and speed upside. In 2023, he hit .346 with 18 HR and 19 SB. He projects as a potential 20–20 big leaguer. Above-average bat speed, athleticism, and good reads in the outfield. Still developing consistency in contact but shows impact potential.

Levi Sterling Scouting Report

DOB: 17 | POS: RHP | Bats: R | Throws: R | Height: 6'4 | Weight: 190 | School: Notre Dame HS
| Committed: Texas

Summary: Sterling sits 90–94 mph with his fastball, touching higher. Slider is 79–85 mph with bite, and his changeup shows deception in the mid-80s. Has projection to add velocity as he matures physically. Clean mechanics, strong build, and upside as a frontline starter if development continues.

Hagen Smith Scouting Report

DOB: 20 (Sophomore) | POS: LHP | Bats: L | Throws: L | Height: 6'3 | Weight: 215 | School: Arkansas

Summary: Smith throws a full arsenal: 4-seam, sinker, splitter, slider, and curveball. Fastball sits 93–95 mph, touching 98. Splitter is his best secondary pitch with late drop. Slider is developing into a swing-and-miss offering. Electric stuff overall, but he battles control and command inconsistencies. Projects as a potential top-of-rotation arm if he refines strike-throwing.

POSITION PLAYER

Report #:

Grade:

Instructor:

Player: **Rudy Rott**

Pos: 1b

School: Ohio University

Type: 4YR

Team Name: Bobcats

Bats: L

Class: SO

Group #

Date of Birth: 09/26/96

Throws: R

Elig Yr: 2018

Adj OFP: 55

2

Height: 5-11

Games: 9

Basic OFP: 52

Weight: 212

Innings: 81

Hit Type: Straight Away

Report Date: 05/21/17

Scout: M. Johnson

Stance/Hit Approach:

Slightly open stance, relaxed setup, smooth loading action, short stride

Physical Description:

Short, stocky, not much room to grow

ML Comparison: Brandon Belt

Category	Present	Future	Comments
Hitting Ability *	55	60	Good command of the strike zone, hits to all parts of the field, good barrell on ball, smooth loading
Power *	50	55	line drive gap-to-gap hitter. Had 11 homeruns for the 2017 season
Running Speed *	40	40	Average runner, slow out of the box, 4.31 average to 1B
Base Running	40	45	Will not ever be a basestealer
Arm Strength *	50	50	Average arm; only saw him get to air it out once but was able to make a strong throw to second ba
Arm Accuracy	50	55	Good footwork with on point throws, consistent mechanics
Fielding *	55	60	Former catcher with soft hands, good awareness around him, reads hops and gets low
Range	45	50	slow on the field as well, doesn't cover much ground, but makes up for it with athleticism
Baseball Instincts	50	50	Doesn't make mental mistakes in the batters box or on the field
Aggressiveness	50	50	Agresiveness at the plate leads to more strikeouts

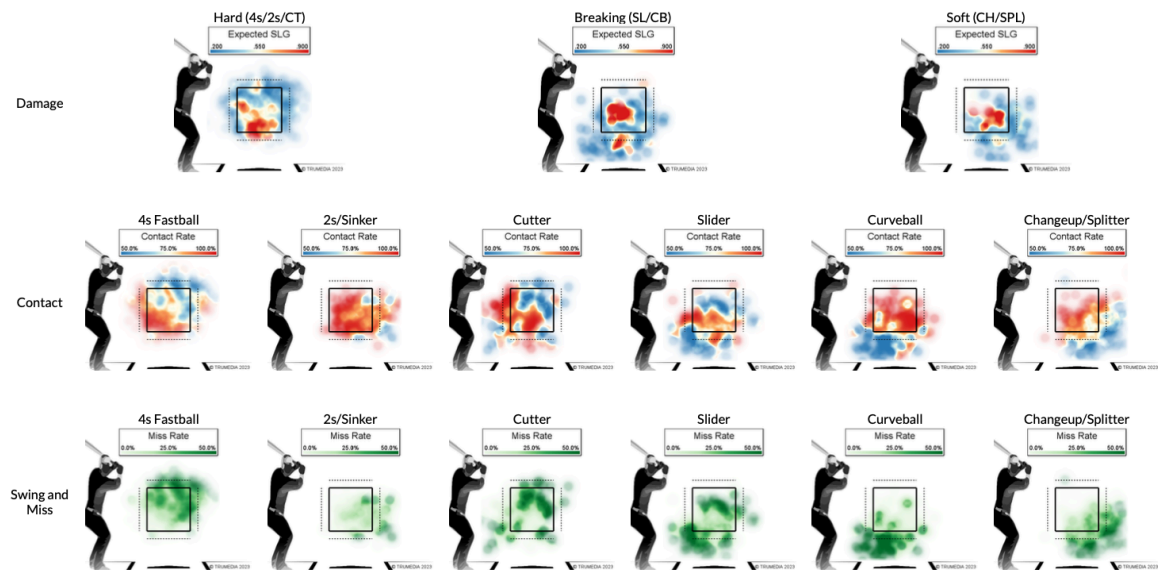

Summation: Rott doesn't wow you with his physical attributes but the fact of the matter is he can flat out hit. Bat is very consistent and repeatable, makes a lot of contacts with an easy stance and swing. Gets the barrel on the ball and can drive it all over the field. Average bat speed. Agresiveness can lead to more strike outs, but with maturity those should come down. Defensively, Rott is an athletic first baseman who can make all the plays at first with excellent footwork.

Video visual for player meeting: <https://youtu.be/Rsbm2ngL3lY>

Andrew Chafin Tipping

On FB/SI, Chafin flared his glove 82% of the time as he's coming set.

Glove flair FB/SI (video below)

Video Link: <https://youtu.be/bu0xvJmLy0OQ>

Compared to his Slider where he only flares his glove once.

No glove flair Slider (video below)

Video Link: <https://youtu.be/SB47dKRv4hg>

While its more variable, if there is space between his glove and body like the **picture below** then it's a FB/SI.

Vs. glove closer to body (pictured below)

Finally, with a man on second, you can see that he holds his wrist slightly higher when throwing a slider compared to when he throws a fastball, where his wrist is lower.

Fastball/Sinker (Lower wrist positioning) (pictured below)

Slider (Higher wrist positioning) (pictured below)

Kevin Herget Tipping

On the Changeup he has wrist flush with top of glove, for the FB/CT/SL he does not.

Fastball (pictured below)

Changeup (pictured below)

Its more subtle to hitters but you can still notice a slight difference with wrist position.

Fastball

Changeup

Note: Did not see runners on base. He could be showing grips in his glove with men on second.

Gabe Speier Tipping

As Speier's glove comes up, it's often closer to his chin on the sinker, resulting in more visible space between his glove and body.

Slider (pictured below)

Sinker (pictured below)

Collin McHugh Tipping

The forearm forms a 90-degree angle on the slider compared to the cutter, where it's lifted slightly higher.

Slider (pictured below)

Cutter (pictured below)

Dinelson Lamet Tipping

The wrist is slightly raised on the slider and flatter to the glove on the FB/SI. With a man on second base, this can be seen and relayed to the batter.

Sinker (picture below)

Slider (picture below)

Luis Garcia Tipping

García's arm covers more of his belt on his sinkers compared to his sliders and splitters, where more of his belt is exposed.

Sinker - belt NOT exposed (picture below)

Slider - belt exposed (picture below)

Split Finger - belt exposed (picture below)
