The Committee may solicit advice/analysis regarding the technology from outside individuals. The inventor/creator must be present at the meeting in which their invention/creation is discussed and must be allowed to speak on their own behalf. In making its assessment, the committee will rely on information provided by both the inventor/creator and the University. Committee deliberations will be in closed session to protect proprietary information. Similarly, committee records will be kept confidential and committee members will sign a Non-Disclosure Agreement. If the University, by either written policy or specific act, chooses not to act upon the right of intellectual property licensure or patent or similar methodology for assertion of rights, ownership passes wholly to the inventor or creator.

When necessary, the committee shall review invention disclosures and other information to evaluate the University's contribution to the development of particular intellectual properties. In many cases the inventor/creator will reach an agreement with the University concerning ownership rights and equity interest without the need for review by the committee. The purpose of the review will be to help the parties reach agreement within the framework of this policy. The final resolution of any disagreement concerning the application or interpretation of this policy will be governed by applicable law and collective bargaining agreements.
