

Honda Integra Type R Touring Car '02

The Honda is another tricky car, it destroys tyres and, at these specs, handles like a truck without a tune. However, and this had been proved, when tuned, this car is an absolute monster, it had a win on High Speed Ring in Season 1 with Furinkazen, but in Season 2, GTP_Akmuq did what many thought was impossible, win on a normal track at Laguna Seca. The car dominated in the TOCA Legend support series which GTP_akmuq won, and it could well be the car to be in for the season.
