Lesson 2 - Converting Area and Volume

LEARNING GOALS:

-

RECAP

How many meters are there in 20 feet?

Sort the units on screen into Length, Area or Volume and into the correct system

	Length	Area	Volume
Imperial System			
Metric System			

The above table provides us with a hint for what to do with our units:

To convert area we _____

$10mm = 1cm \rightarrow 1\,cm^2 =$_____	$1\,yard = 3\,feet \rightarrow 1\,yard^2 =$_____

To convert volume we _____

$10mm = 1cm \rightarrow 1\,cm^3 =$_____	$1\,yard = 3\,feet \rightarrow 1\,yard^3 =$_____
