

Chrome Updates Saving Tabs

With all the Chrome updates that are pushed out I have a feeling some of you are losing your tabs when you get back into Chrome. I would love to share this fix that Mark shared with me, in case you would like to update your settings so that does not continue to happen.

When in Chrome, click CHROME in the upper left hand corner then click SETTINGS.

Scroll down and click ON STARTUP

Then choose the middle option CONTINUE WHERE YOU LEFT OFF.
