TopSpin install Instructions

You must first register for a bruker user account:
https://www.bruker.com/about-us/register.html

WINDOWS INSTALL:

For Windows users, go to TopSpin for Windows section:

https://www.bruker.com/protected/en/services/software-downloads/nmr/pc/pc-topspin.html

And then click on link for TopSpin 3.6.3 & CMC-assist 2.15 to download package

Suggest to use processing only package and use all defaults including for it to update Windows firewall rules automatically

After installation, start-up topspin - will say missing license - click on "Request a Free Academic License"

Click on "Request Personal License Ticket Now" box to get code

Click on "Install License Ticket" box and paste code to activate license - I chose to bind license to computer

Run "expinstall"

MAC INSTALL:

For Mac users, go to TopSpin for MacOS section:

https://www.bruker.com/protected/en/services/software-downloads/nmr/macos.html

And then click on link for TopSpin 3.6.2 Processing Only to download package
