

# Christopher Moore

## Software Engineer / Full Stack Developer

[www.chris-moore.info](http://www.chris-moore.info) [Github](#) [LinkedIn](#) [moorechristopher@gmail.com](mailto:moorechristopher@gmail.com) 828-442-2233

**SKILLS** JavaScript, React, Redux, HTML, CSS3, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku, and D3.js, Power BI, OOP and Test-Driven Development (Playwright), SAS, R, Python.

## PROJECTS

**CodeMark** - (MongoDB, Express, React.js, Redux, Node.js, Mongoose, Webpack, CSS3)

[Live](#) | [Github](#)

**CodeMark allows you to save, share, and discover code note snips - methods, functions, algorithms, etc. in a variety of languages.**

- Managed daily standup meetings to review progress on assigned features, update the project wiki with our progress, and adjust our sprint goals based on our latest findings and experiences.
- Leveraged a custom responsive design system in Figma as Frontend Lead, that allowed developers to efficiently implement CSS grid and flex layouts, resulting in a pleasant UI/UX on any screen.
- Incorporated the Clipboard API to enable users to easily comment on code snippets and leveraged the CodeMirror API to deliver a familiar note taking experience for developers.
- Created custom animated SVG content placeholders using the React Content Loader library to avoid a jarring loading experience for the user and to maintain page structure while required data is being fetched.

**CryptoCity** - (Redux, ReactJS, Axios)

[Live](#) | [Github](#)

**Interactive crypto dashboard to search up to the minute crypto news, visualize and graph coin price history, compare, and more.**

- Built a chart visualization and data aggregator with React/Redux and Axios to integrate API calls intuitively.
- Used React hooks (useEffect and useState) to create seamless dynamically-updating function components with state dependencies.
- Refined logic of making stylings fully capable and intuitive for mobile.
- Crystallized understanding of React components using Linechart from ReactJS, compact code mapping over data with React components, and effective filtering of API-queried data with alternative material toolkits to create beautiful components.
- Constructed custom loading React component while API is fetching to create seamless search results.

**AuteurFlix** - (React / Redux, Javascript, Ruby, Rails 5, PostgreSQL)

[Live](#) | [Github](#)

**A full stack clone of Netflix allowing users to create/update profiles, accounts, and browse, save and watch films from watchlist.**

- Implemented userauth using Bcrypt to salt and hash user passwords with data stored in PostgreSQL database.
- Connected React/Redux to Rails through RESTful routes by utilizing THUNK middleware and AJAX calls for data handling.
- Configured AWS S3 to host video data, allowing users to efficiently browse and play media while ensuring future scalability.

## EDUCATION

**App Academy** | May 2022

- 1000-hour immersive full-stack web development intensive program with less than 3% acceptance rate

**AS - AB Tech** (Science - Biology/Evolutionary Ecology) | 2008 - 2010

## EXPERIENCE

**Actor** - Central Casting | Dec 2015

- Member of SAG Union. Stand in for lead actor in a feature film. Worked directly with Director and Cinematographer for 3 months to ensure the shots were set up properly production could run on tight schedule. Film just premiered at Sundance.

**Operations Managerial Assistant** - Levi Strauss and Co, Corporate HQ | Oct 2012

- Worked with Manager/buyer's to provide proper samples for meetings and presentations - Answered to VIP Clients (VP of Macy's etc) to provide samples for season in question, as well as maintaining inventory in 12 showrooms
