Abstract ← 11pt, Times New Roman, Bold
The abstract should be clear, concise, and descriptive. This abstract should provide a brief introduction to the problem, objective of paper, followed by a statement regarding the methodology and a brief summary of results. The abstract should end with a comment on the significance of the results or a brief conclusion. Abstracts are written in 11pt, Times New Roman preferably not more than 250 words.
Keywords: Maximum of 5 keywords separated by comma (,), crucial to the appropriate indexing of the papers

1. Introduction← 12pt, Time New Roman, Bold

Introduction written in English with 12 pt, Times new roman, 1 space. In the introduction, the first paragraph contains an explanation regarding the field of research and why the field of research study is important to study. In the introduction you must be able to represent the research problem, previous research and explain the differences between your research and the previous one. Therefore, you must be able to display the GAP research well. At the end you must present the purpose or formulation of the problem in this research.

2. Method← 12pt, Time New Roman, Bold

The research method is written in English with 12 pt, Times new roman, 1 space. In this section you at least present the research design used, research participants/research subjects/populations and samples, data collection, and data analysis.

Tables

Tables are sequentially numbered with the table title and number above the table. Tables should be centered in the column OR on the page. Tables should be followed by a line space (11pt). Elements of a table should be single-spaced, however double spacing can be used to show groupings of data or to separate parts within the table.

Table headings should be at 11pt. Tables are referred in the text by the table number. eg: Table 1. Do not show vertical lines in the table. There is only horizontal line should be shown within the table.

Table 1
Formatting Rules

Object	Font	Alignment	Space above	Space below
Title	16pt, Arial, Bold	Left	18pt	24pt
Author(s)	12pt, Arial, Bold	Left	0pt	12pt
Addresses	10pt, Arial	Left	0pt	0pt
Email	10pt, Arial	Left	0pt	12pt

Table title	11pt, Arial Narrow	centered	6pt	3pt
Figure title	11pt, Arial Narrow	centered	3pt	6pt

Equations

Equations should be numbered serially within parentheses as shown in Equation (1). Equation should be prepared using MS Equation Editor (not in image format). The equation number is to be placed at the extreme right side.

$$\int_0^{r_2} F(r,\varphi)\, dr\, d\varphi = [\sigma r_2 / (2\mu_0)] \cdot \int_0^{\infty} \exp(-\lambda\,|z_j - z_i\,|)\,\lambda^{-1} J_1(\lambda r_2)\, J_0(\lambda r_i)\, d\lambda\,. \quad (1)$$

Figures

Figures are sequentially numbered commencing at 1 with the figure title and number below the figure as shown in Figure 1.

Figure 1

One of the traditions in Indonesia

3. Results and Discussion ← 12pt, Times New Roman, Bold

Orginal Article

Manuscript Heading, Font, and Spacing ← 12pt, Times New Roman, Bold. Manuscript should be typed using word processors (Microsoft Word or Open Office) software. The font used throughout the paper is Times New Roman. The paper size is A4 (i.e., 210 x 297 mm), one-column format with a 2.5 cm margin at the top, a 2.5 cm margin at the bottom, 2.5 cm margin on the left, and 2.5 cm margin on the right. Lines are 1 spaced, justified. Use of pronouns such as I, we etc is to be avoided.

Manuscript submitted to this journal should follow the heading below, except for the review article: Title; Authors Name; Authors Affiliation; Abstract; Keywords; Methods; Results and Discussion; Conclusions; Acknowledgments; and References.

Results should be clear and concise. The results should summarize (scientific) findings rather than providing data in detail. Please highlight differences between your results or findings and the previous publications by other researchers.

The discussion should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

In discussion, it is the most important section of your article. Here you get the chance to sell your data. Make the discussion corresponding to the results, but do not reiterate the results. Often should begin with a brief summary of the main scientific findings (not experimental results). The following components should be covered in discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

4. Conclusion ← 12pt, Times New Roman, Bold

Conclusions should answer the objectives of research. Tells how your work advances the field from the present state of knowledge. Without clear Conclusions, reviewers and readers will find it difficult to judge the work, and whether it merits publication in the journal. Do not repeat the Abstract, or just list experimental results. Provide a clear scientific justification for your work and indicate possible applications and extensions. You should also suggest future experiments and/or point out those that are underway.

Acknowledgments ← 12pt, Times New Roman, Bold
Recognize those who helped in the research, especially funding supporters of your research. Include individuals who have assisted you in your study: Advisors, Financial supporters, or may other supporter i.e., Proofreaders, Typists, and Suppliers who may have given materials.

Declarations ← 12pt, Times New Roman, Bold
Author Contribution : Author 1: Conceptualization, Writing - Original Draft, Editing and Visualization; Author 2: Writing - Review & Editing, Formal analysis, and Methodology; Author 3: Validation and Supervision (https://www.elsevier.com/authors/policies-and-guidelines/credit-author-statement).
Funding Statement:

Gema Wiralodra is licensed under a Creative Commons Attribution 4.0 International License

This research was funded by the director general of Strengthening Research and Development with the Ministry of Research, Technology and Higher Education of the Republic of Indonesia for supporting and funding this research.

Conflict of Interest:
The authors declare no conflict of interest.
Additional Information:
Additional information is available for this paper.

5. References ← 12pt, Times New Roman, Bold

The main references are Books, International Journals, and Proceedings. All references should be to the most pertinent and up-to-date sources. References are written in APA Style. Please use a consistent format for references – see examples below (12pt):

Book:

Cahyono, A. N. (2018). Learning mathematics in a mobile app-supported math trail environment. Springer International Publishing. https://doi.org/10.1007/978-3-319-93245-3

Book that consists of some articles:
