

This guide part of a c-apps support guide series based in r/NCTranslations by u/enovel, u/fluffymelodies, u/HanyaYM, u/imkunfused, u/wakeuplikeWTF, and u/wayvillage. **For more translations of NCT and WayV content and support guides, please check out r/NCTranslations!**

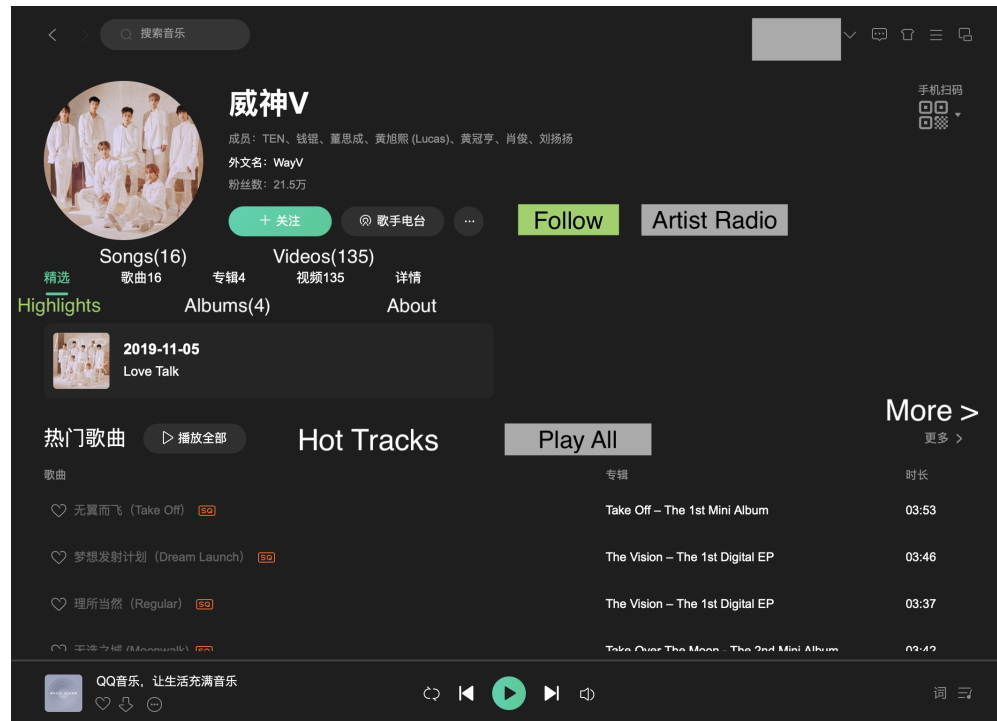

### Searching for Music and Artist Pages in QQMusic Desktop Client

1. Go to the search bar. Search for WayV and click the boxed results to go to WayV's music page.

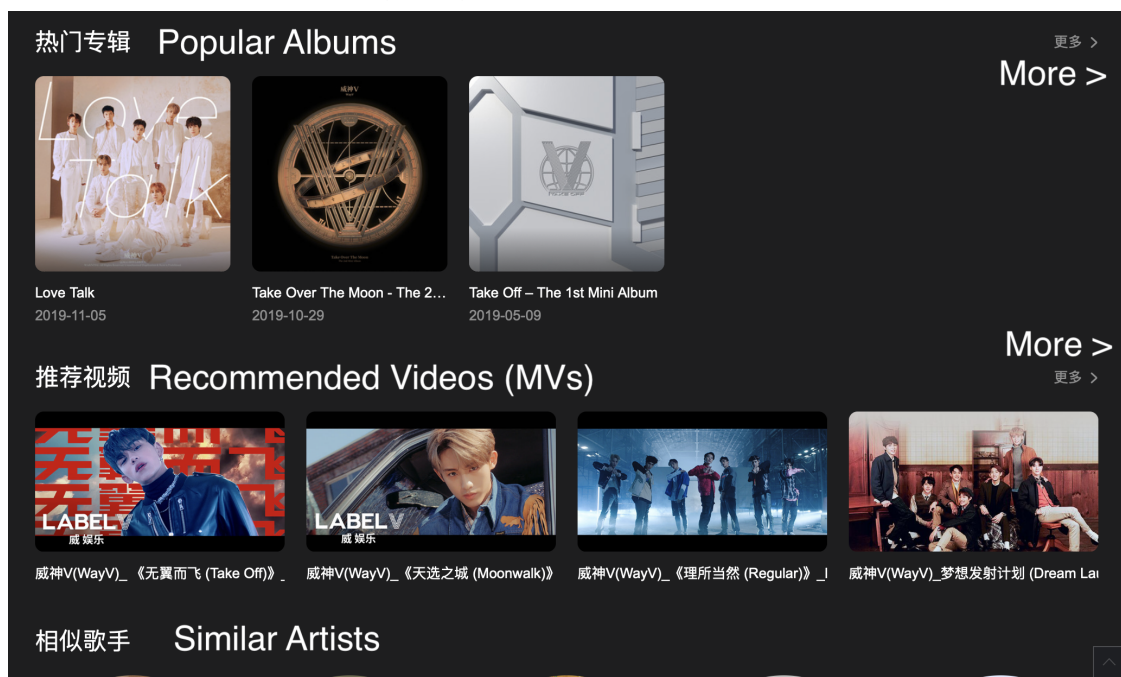

2. This is the main music page. Click “关注” to follow WayV. Other functions are translated within the image below:
  - a. Note that when songs are greyed out, this means the song cannot be played. This is usually due to a location restriction on these songs and will require a VPN. We recommend [Transocks](#) or [Malus](#) as those have both worked for a lot of people.

b.

3. Scroll down to find albums, MVs, and similar artists.

4. Clicking on any album will give you an interface like this:

# Take Over The Moon - The 2nd Mini Album

威神V
