Summary

I am currently studying my third year at the University of Johannesburg in Gauteng and a bachelor of education. As a student at the University of Johannesburg and a student teacher, I have learned more about the wisdom of growing up in this department and feel in love with education, learning is all about fun and exploring our minds in challenging the given knowledge

During my free time, when I am not studying and exploring education, I enjoy cooking and exercising with other friends and mentors and I also enjoy talking and socializing with my peers and mentors about their experiences on their journey about being a teacher and becoming a teacher.

I have fallen in love with the faculty of education because I get the chance and opportunity to work in an environment that encourages me to succeed and grow professionally where I can utilize my skills, knowledge appropriately and grow professionally.
