"There are two big tubs with all the other stuff. There's a Maelsrom stir plate with an Erlenmeyer flask. A capper, carboy dryers, fast racks for bottles, siphon, cane, tubing, thermometers, and on and on. The keggles with holes has a brand new stainless ball valve inside that just needs to be installed. 4 carboys in total including 1 big mouth bubbler. That little cooler with the copper pipe I used as a water chiller for the hot summer months. This is absolutely a complete brew kit that I chose specifically for an indoor closet for storage. It's been in a storage facility for a year and my garage the last couple weeks. I don't really have a clean place to wash everything without making mud and making everything worse so

It's as is. There's new tubing in the tubs and a ton of other stuff. I have books. I'm forgetting stuff but anyway it's a treasure trove. I spent thousands putting this together but I'm willing to let the entire lot go for **\$1000.**"
