In Percy Jackson: ocean of Monsters, selecting the dumbest character could be a prodigious task. Is it one in every of the young heroes, United Nations agency stand around staring once they ought to be running or share tender moments once they ought to be finishing off associate evil opponent? Is it the young villain, United Nations agency doesn't perceive that resurrecting a carnivorous god notable for consumption his youngsters is probably not the safest or smartest thanks to rebel against the standing quo? Or area unit these characters simply prisoners — very similar to the audience — of a script therefore uninspired that it demands their stupidity?

Hard to mention. What's easier to deduce, though, is that this second installment within the series supported Rick Riordan's in style young adult fantasy novels could be a dud. ocean of Monsters — that, strangely, includes exactly one ocean monster, not nearly enough by my reckoning — is slow-paced and unintelligent, with curiously lackluster action scenes that trudge at the side of all the joys of a prep assignment.

Sea of Monsters finds Percy (Logan Lerman of The Perks of Being a Wallflower) and his buddies at Camp sibling, a secure haven for the offspring of some seriously promiscuous gods, judgement by the big variety of teens there. Percy's male parent is Poseidon, which provides Percy the flexibility to govern water, though in terms of parental steering Poseidon is de facto kind of a debtor.
