

Subject Line: Direct traffic to your abaya page with one click

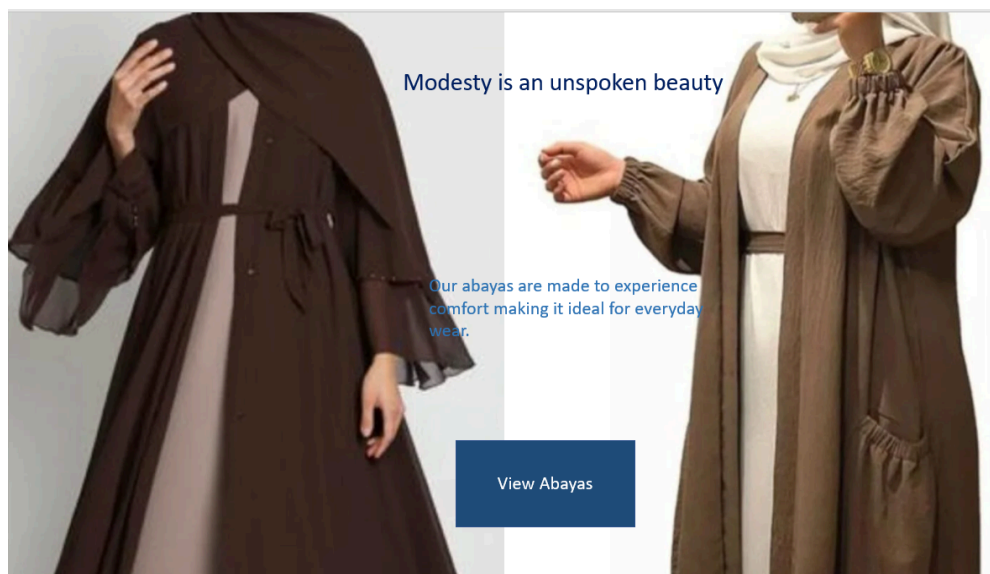

Salam alaykum Jilbabaya

Your homepage could be enhanced with a preview page which links customers directly to your abaya page.

Introducing a preview page will reduce customer's time and effort of searching on the website for the intended product they want to buy.

Zadina Abayas London and Arabian Nites, both nearby businesses, have implemented a link preview page on their respective homepages which catches the eye of potential customers right away.

I've created an example to give you an idea how it looks.

Does the example align with the brand's image?
