Interview Topic

RATIONALE

Throughout the duration of this interview, I wish and aim to discover more about the already established SCP-1048-A “Flesh” and SCP-610 relationship, seeing as he was previously able to command them, and seems to be in a complicated relationship ever since SCP-610-1 returns.

Interview Results

TESTING PROTOCOL

Based on the [evidence found throughout this Interview](#), I conclude :

Throughout this interview, SCP-1048-A demonstrated a certain degree or relationship with SCP-610 (both the Hivemind and the normal one) it seems as if [their relationship changed following SCP-610-1 returns](#)

Based on the results of this interview I have determined the following about SCP-610 and SCP-1048-A hierarchy and relationship in general.

I have also determined that SCP-610 does not seem to take SCP-1048-A "Flesh" as an intruder, or a foreign instance. Knowing that Flesh is made out of SCP-610 (See Lore Event 001) this is in direct rivalry with SCP-1048-D which is also made out of another anomaly (Void Guardian) but is constantly being hunted and killed by those.

I theorize that since SCP-1048-A was able to develop a friendship / relationship with SCP-610, despite shrugging when asked if he was able to communicate with them (which I interpret as a yes seeing the aforementioned context) he may be able to translate 610-2 speech when the hivemind is absent.
