

10-Minute Quick-Start Guide

(Bring dead assets back to life — fast)

MINUTE 0–1 — WHAT YOU’RE ABOUT TO DO

In the next 10 minutes, you will:

Take one old or ignored asset

Paste it into one prompt

Get a modern, market-ready version people would actually buy

No rewriting.

No guessing.

No starting from scratch.

MINUTE 1–2 — PICK YOUR “DEAD” ASSET

Choose one of the following:

Old PLR you never used

A failed product or launch

A generic PDF

Notes or drafts you abandoned

Example:

“The Ultimate Local Business Marketing Guide”

Open the file.

Select all text.

Copy it.

MINUTE 2–3 — RUN THE RESURRECTION ENGINE

Open ChatGPT

Paste the Asset Resurrection Engine™ master prompt

Press Enter

You'll be asked one question:

“Paste the full text of the old asset you want to resurrect.”

Paste the entire asset.

Press Enter.

Do not edit anything.

MINUTE 3–6 — WATCH THE ASSET COME BACK TO LIFE

The system will automatically deliver:

Failure Diagnosis

Why the asset likely failed or was ignored

 Hidden Value Extraction

The strongest idea that still matters today

 Resurrected Asset

A rebuilt, modern version with:

A new outcome-driven title

Clear relevance to today's market

A reason to exist right now

Same content.

New life.

MINUTE 6–7 — SAVE YOUR RESURRECTED VERSION

Copy the resurrected asset

Paste it into a new document

Save it as your revived product

This is now a sellable asset.

MINUTE 7–8 — OPTIONAL: RESURRECT AGAIN

Want more?

Take another old asset

Paste it into the same prompt

Run the engine again

Each run revives one more hidden asset.

MINUTE 8–9 — HOW PEOPLE USE THIS

Resurrected assets can be:

Relaunched as new products

Bundled with other offers

Used as lead magnets

Positioned as upsells

You didn't create more.

You recovered value.

MINUTE 9–10 — YOUR NEW DEFAULT MOVE

Before creating anything new:

Look at what you already own

Run it through the Resurrection Engine

Decide if it deserves a second life

Most people skip this step.

That's why they waste assets.

 YOU'RE DONE

Creation costs time.

Resurrection unlocks value you already paid for.

That's the edge.
