ABSTRACT (CLICK Abstract)

Purpose: Explains what the research aims to achieve, why this research is important, and what is expected from its results. **Methodology:** Describes the approach and techniques used to collect and analyze data in the research. This includes the research design, instruments used, and the procedures for data collection and analysis. **Results:** Presents the main findings of the research. This includes data or information obtained during the research and interpreted in the context of the research objectives. **Findings:** Reveals significant outcomes from the research that contribute new insights to the field of study. This can include innovations, discoveries, or previously unknown information. **Novelty:** Describes the new or innovative elements of the research that distinguish it from previous studies. This can involve new approaches, new methods, or new findings. **Originality:** Highlights the unique aspects of the research that demonstrate its authenticity and contribution to existing knowledge. This includes how the research offers new perspectives or solutions. **Conclusion:** Summarizes the main findings of the research, the interpretation of the results, and the implications of these findings. Conclusions may also include recommendations for further research or practical applications. **Type of Paper:** Identifies the type of manuscript submitted, such as a research article, literature review, case study, technical report, etc. The abstract is a concise summary of the research that includes the research objectives, a summary of the problem, the methods used, the results, and the conclusions briefly. The abstract should not exceed 200 words. Avoid using references in the abstract. For manuscripts in Indonesian, the abstract should be written in both Indonesian and English. For manuscripts in English, the abstract should be written only in English. (Times New Roman, 9pt, single-spaced). (CLICK C_ABSTRACT)

INTRODUCTION **(CLICK HEADING_1)**

It covers background of study, motivation in writing the paper, problems, brief literature review that relates directly to research or previous findings that need to be developed, and ended with a paragraph of research purposes. It should be written in paragraphs. If there is a quote with APA 7th style and use the style (click [hyperlink](#)) in the link to the library.example : [Nisa, S., & Rahman, Y. A. \(2019\)](#)

The introduction is written without sub-headings, and contains background, literature review and research objectives. The review uses literature or research results that are relevant to the reference provisions used no more than the last 10 years. The introduction is written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt. **(CLICK NORMAL ARTICLE)**

METHOD **(CLICK HEADING_1)**

Metode Analisis **(CLICK HEADING_2)**

It describes the research design used comprises of methods, technique in collecting data, technique of data analysis, and variables measurement which are written in paragraphs, not numbering. The technical information of the study presented clearly. Therefore, readers can conduct research based on the techniques presented. Materials and equipment specifications are necessary. Approaches or procedures of study together with data analysis methods must be presented. Research methods in quantitative research consist of: (1) place and time of research, (2) type of research, (3) research variables, (4) sampling techniques, (5) data collection techniques, and (6) data analysis design. For qualitative research, the approach used in the research is described as is common in qualitative research. Research Method does not use sub-headings and is written using Open Sans font size 10. Spacing rules before 0 pt, After 1 pt, Line spacing Exactly, At 12 pt.

(CLICK NORMAL ARTICLE)

RESULTS AND DISCUSSION **(CLICK HEADING_1)**

RESULTS **(CLICK HEADING_2)**

This part should describe informative results of empirical research which are written systematically and critically. Tables and figures can be presented in this part to support the discussion, for examples table of statistics-test results, figures of model test results and etc. In general, journal papers will contain three-seven figures and tables. Same data can not be presented in the form of tables and figures. Results and Discussion describe the results of data processing, interpret findings logically, and link them to relevant reference sources. Submission of research results can be equipped with tables, graphs (images), and/or charts, and not printscreens. Results and discussion can use sub-headings as needed, and written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt.

(CLICK NORMAL ARTICLE)

If there is a quote with APA 7th style and use the style (click [hyperlink](#)) in the link to the library.example : [Nisa, S., & Rahman, Y. A. \(2019\)](#)

DISCUSSION **(CLICK HEADING_2)**

Discussion of results should be argumentative and should point out on how the findings, theories, previous study and empirical facts are relevant and contributes something new to knowledge of economics development. **(CLICK NORMAL ARTICLE)**

The table title is placed at the top of the table and is numbered according to the order of the table. The table is written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt.

Table 1. Coefficient of Determination Guidelines

Relationship Level	Coefficient Interval
4,20 – 5,00	Very Good
3,40 – 4,19	Good
2,60 – 3,39	Pretty good
1,80 – 2,59	Not good
1,00 – 1,79	Very Not Good

Source: Processed Data, 2014

Graphics (images) and/or charts in original form or not scanned. The graphic/image/chart title is placed at the up.

Figure 1. Trend of PBB Acceptance at DPPKA City of Bengkulu

2014-2016 year **(CLICK FIGURE)** For Figure Title

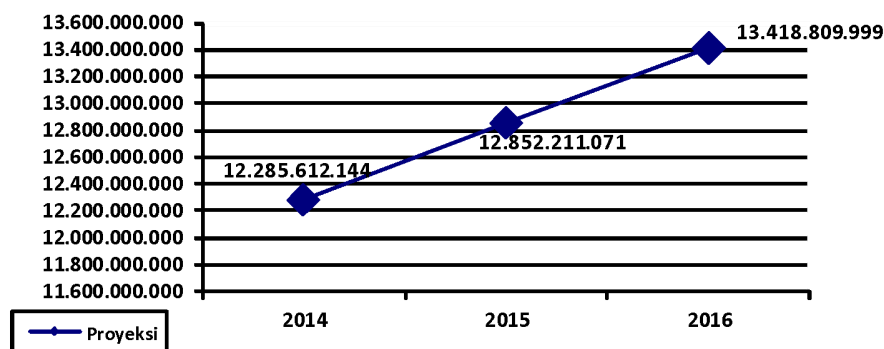

Table 1. and figure 1. shows that the potential for land and building tax (PBB) revenue in Bengkulu City has increased from year to year. This is due to developments, the community's economy, and the impact of tourism, both directly and indirectly. **(CLICK NORMAL ARTICLE)**

CONCLUSION **(CLICK HEADING_1)**

It should illustrate brief and clear results of study, contributions to new theories, and new ideas for future researches. Here, the theoretical and practical implications should be written in paragraphs. The conclusion contains a brief summary of the research results and discussion. In this section, suggestions can be added regarding research conclusions in the form of practical actions, development of new theories and further research. Conclusions are written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt. **(CLICK NORMAL ARTICLE)**

ACKNOWLEDGMENTS (Optional) *(CLICK HEADING_1)*

Acknowledgments only for those who funded research activities, written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt.

REFERENCES *(CLICK HEADING_1)*

Writing a bibliography is required to use a reference management application (for example, Mendeley) with APA 7 (American Psychological Association version 7th) style. The bibliography is written using Open Sans font size 10. Spacing rules before 0 pt, After 0 pt, Line spacing Exactly, At 12 pt.

Conditions regarding references:

The references used are at least 30 references, and 80% are primary sources in the form of research journal articles from the last 10 years.

The more primary references that the paper has, the more qualified the paper will be. However, self-citation can reduce the paper score. Citations from previous EDAJ related articles are necessary.

Manuscripts are written by using standard citation application (Mendeley/ Endnote/ Zotero). Harvard style reference should be used. Ensure that the references are referred on the paper and arrange them alphabetically
