

Common Application Support

Anything and everything you need to know

Have a question about any section of the Common App?

AXS has created an excellent resource for students on navigating **every single section** of the Common App. This resource consists of very short (2-5 minute) videos on each section of the Common Application. Use this for questions, tips and additional resources to help you craft the best application you can. Spend a few minutes on this - it's worth the time!

What is AXS?

"The AXS Companion is a free, open online resource designed by professional consultants to be used side-by-side with Common App as you work through your application. Each section includes explanatory videos, helpful tips, a glossary of application terms, and links to resources mentioned in the vides." AXS has partnered with Oregon State University to develop this resource.

Review the [AXS Common App Companion](#) for any questions or if you're uncertain about a section - you'll feel much more confident about your responses.**

****Scroll** down the page to find a **Table of Contents** that will point you to each individual section.
