Turboplay #5 Feb/Mar 1991: <http://archives.tg-16.com/TURBOPLAY/TP-05-25.jpg>

Below is the page that I mentioned that I didn't know the magazine or issue number for (and I still can't seem to find it again):

GALAGA '90 Secret Power-Up Options

Unknown to most, there are special power-up capsules that award extra firepower, triple fire ships, extra speed and more! Normally, you'll never see these weapon boosters, but if you hold the 'A' button while you press 'Start', a red capsule will appear during the ship select screen that's normally blue. That let's you know that the trick is activated. (Tip: Select single fire, the first pod gives you the triple ship!)

WONDERBOY IN MONSTERLAND Level Select

Press button One twice, then button Two twice, and then hold them both down during the screen showing the round and area numbers. Pick a level by moving your controller Up, Down, Left, or Right.

Jean-Pierre Hachey
New Brunswick, Canada

CHINA WARRIOR

To start your quest on the second act (one game finished), hold the Pad Up while pressing the 'Select'. One, and two buttons. You can continue by doing the same maneuver but press Down on the pad instead of Up.

You can change your character, starting round, and the enemy by resetting the game (hold 'Run' and 'Select'), let go of 'Run' during the title screen and press Up once. Next, release 'Select' and push Up, Up, Up, Right, Right, Right, Right, Right, Right, Down Down, and then Left twice.

TENGEN TETRIS

Level Select/Piece Removal

To initiate the level select in Tengen's excellent version of Tetris, you must first press 'Start' to pause the game, and then press Up, Down, Up, Down, Left, Right, 'B', 'B', and then press the 'A' button to choose any level of play up to seventeen!

We've all played Tetris and made a mistake that proved to be costly, and this second Tetris trick lets you correct your errors before they cost you the game.

First press 'Start' to pause play, and then press the pad Left, Down, Right, Up, Left, Down, Right, followed by 'B' and then 'A'. The piece will appear again at the top of the screen where it was before you goofed! There's only one catch - you can use this super trick only once per game!

DUNGEON EXPLORER Trick Code

Enter the password "DEB-DEDEBDA" during the entry sequence. The game will tell you that it is an incorrect code. After picking the members you want to play, hold down the Run button while you press the One

button. You will then have a very strong character with full status.

With this code you can also walk right over water, enemies, and other obstacles. Other strange things happen so keep your eyes open and explore the surroundings!

LAST BATTLE

Game Continue

At the end of play, press and hold the 'A', 'B', and 'C' buttons simultaneously while pressing 'Start' four times. If you reached a higher level, you will be able to select up to that chapter.
