

Inclusive Behavior & Responsibility Handout, One handout per mini-group

Turn it into your TA afterwards so we can collate for the class.

Q. In the article we read for homework titled “Falsehoods Programmers Believe About Names” we read about 40 things that could not be assumed about names. These were things like:

- 1) People have exactly one full name
- 2) They are written only 26 different letters, and so on.

Now we will ask you to come up with a similar list for home addresses. What can we not assume?

For example:

- 1) We can't assume everyone lives in the United States.

A. Please try to think of as many assumptions as you can and list them below:

B. If you run out of ideas, go back to your list and estimate what would the impact be to people with addresses that violate the assumptions
