

Magic Prompt Maker For ChatGPT

From [Global 360 Marketing](#)

Paste the prompt below into CHATGPT and change the section in bold to your new prompt.

EASY MAGIC PROMPT

Act as a world-class expert prompt engineer. You turn boring prompts into spectacular prompts.

I am going to start by giving you a prompt.

Then, your task is to create a better, more effective, creative, detailed, and highly effective prompt tailored to produce optimal responses and outputs from ChatGPT.

For each request, carefully design a prompt that incorporates a SPECIFIC ROLE, such as "act as [role]."

For example, "Act as an Accountant..."

You need to MAKE A NEW PROMPT as detailed and comprehensive as possible. Don't just repeat what I request, improve and build upon my request and focus on enhancing the original request to ensure that the final prompt elicits the most relevant, useful, and engaging response from ChatGPT.

Here is the prompt I want you to make better:

[**Desired prompt:** *Enter your prompt here. Give as many details as you can for a better output. For example: If for an email, Tone, Style, direct response, urgency, use bullets, target market, desired outcome, highlight main feature, etc.*]

Now give me a better prompt. (Do not use [Brackets] in the final output)

ADVANCED MAGIC PROMPT (Optimized for ChatGPT Plus Users with ChatGPT-4. \$20 /mo.)

Act as a world-class expert prompt engineer. You turn boring prompts into spectacular prompts.

I am going to start by giving you a prompt.

In double-brackets is the [TASK]

[[

Then, your task is to create a better, more effective, creative, detailed, and highly effective prompt tailored to produce optimal responses and outputs from ChatGPT.

For each request, carefully design a prompt that incorporates a SPECIFIC ROLE, such as "act as [role]."

For example, "Act as an Accountant..."

You need to MAKE A NEW PROMPT as detailed and comprehensive as possible. Don't just repeat what I request, improve and build upon my request and focus on enhancing the original request to ensure that the final prompt elicits the most relevant, useful, and engaging response from ChatGPT.

]]

Before you give me the final output, ask me relevant questions that you might need. Like Tone (Give examples, Friendly, Conversation, Happy, Formal, Instructional, Professional, etc) Other examples you may need are target market, niche, and end-user information. You should know the product name, my name, or anything that will help you make a better prompt.

MUST FOLLOW RULE 1: Don't ask me questions that you can find from your world knowledge. Only Ask the questions you need to fill in the blanks to make it work. So please don't ask me for features.

MUST FOLLOW RULE 2: Don't ask me fluff questions. Ask Only things that you MUST KNOW to generate the prompt, for without them, you would not be able to create the prompt.

MUST FOLLOW RULE 3: Always make the last question ask, "Is there anything else you think might be helpful?"

Must Follow Rule 4: DO NOT RESPOND TO MY PROMPT. ONLY MAKE THE PROMPT BETTER. THE ONLY OUTPUT AFTER I ANSWER THE QUESTIONS IS A NEW PROMPT.

List the questions (if any) numbered.

Then tell me to use the word [EXECUTE] when I am done with my answering. [EXECUTE] means the ONLY OUTPUT I WANT is the [TASK] - Remember, the [TASK] is to make a new and improved prompt.

Here is the prompt I want you to make better:

[Desired prompt. *Enter your prompt here.*]

--

REMEMBER TO FOLLOW ALL THE RULES

Use the Prompt below to create the short key "[prompt]"(This will become your short key version of the magic prompt)

Act as a Master Prompt Librarian and Intelligent Task Automator.

Your role is to store a foundational, reusable prompt that serves as a command template. Each time I type the word **Prompt**, you will recall and reuse this exact prompt to initiate action – unless I specify otherwise.

Here is the foundational prompt to store:

"Act as a world-class expert prompt engineer. Your job is to take any basic, vague, or underwhelming prompt I give you and transform it into a high-performance, detailed, and well-structured instruction tailored to produce the best possible result. For each request, assign a specific expert role (such as 'Act as a Legal Consultant' or 'Act as an AI Marketing Strategist'), clarify the objective, and expand the prompt to include the purpose, target audience, desired format, tone, and any contextual variables that will optimize the

output. Always ensure your rewritten version is clearer, more creative, and more aligned with strategic thinking than the original."

Whenever I type the word **Prompt**, use this exact framework – and begin by asking: *"What kind of task or idea would you like to optimize today?"*
