

2025-26
SMITH COUNTY SCHOOL SYSTEM
OUT-OF-COUNTY PROFESSIONAL DEVELOPMENT FORM

Directions: Please fill out each section. Use the back of this sheet if more space is needed. This form must be filed in the Central Office within 5 days of attending the meeting.

Attendance documentation or certificate, if applicable, is to be attached to this form.

Teacher Name: Jacqueline Crawford School: Gordonsville Elementary

Title of Activity: Active Students, Active Learner: Virtual PD Week 2025

Date: June 9-13, 2025 Location: Online Hours: 18

Name of Professional Development Attended/Briefly Summarize Each:

Game Based Learning, Soccer (Beautiful Game), Health and Nutrition, Vaping, SMART for kids, Technology Use, Recess Activities, Disc It, Increasing Physical Activity, The Walking Classroom.

How Does This Apply to Your Teaching Position?

All of these topics help me learn how to use the standards in my classroom as well as games and new technology.

What specific topics/skills will you introduce or incorporate into your teaching strategies as a result of this meeting?

I learned several topics and skills to use in PE during this week of learning. There is a lot of new technology out there especially with the usage of apps. I also learned new activities for recess like gaga ball. I also learned about disc golf, soccer skills, and running activities. There were other sessions related to health and nutrition. For example, teaching kids about vaping and how it can harm their bodies.

Explain the benefit of this activity to student achievement, AYP, and school improvement:

Technology will help me keep track of the students' data. For example, I learned about an app called, "Heart Zone Move." This app helps me keep track and monitor students' heart rates based on movement and exercise. I also learned a new technology game called "Disc It." This is a game used to

play disc golf. I was offered a way to help me create slideshows for my PE class, and I learned how to make awards through Kami. There was quite a bit of information from this week long PD. These things will not only help me in my observations, but will also help me improve student's well-being. PE is one of the most important classes a student will ever take in their career. I use PD's like this one to provide the best possible experience and knowledge so I can teach my students.
