 - a) Parking
 - b) Drinking water
 - c) Canteen
 - d) Adventure bridge
5. Entry is free for children below _____ years.

II. Read the passage and answer the following questions.

As evening arrives, tiny yellow-green lights begin to flash among the bushes. These lights are produced by fireflies. Their bodies can make light without heat, which is why it is called “cold light.” Fireflies use their glow to communicate, find partners, and keep predators away. They are usually found in warm and humid places, especially near trees and water bodies. Fireflies are most active at night, when their glow is easily visible.

1. Fireflies produce light mainly to —
 - a) decorate the forest
 - b) warn enemies and communicate
 - c) stay warm at night
 - d) scare humans
2. The glow of fireflies is called “cold light” because —
 - a) it is blue in colour
 - b) it appears only in winter
 - c) it does not produce heat
 - d) it attracts predators
3. Fireflies are most active at _____.
4. Fireflies are commonly found near trees and _____ bodies.
5. What colour is the light of fireflies? _____
