Ride Multibagger

Invest in Strength, Exit Weakness

I write on stock analysis. Every view/analysis is being shared on twitter handle free bit delayed. Enjoy them free at your own risk. I don't mind if you are ready to pay to disclose my personal trades/views/analysis directly to you. However, My personal views should not be taken as investment advice.

Please do not approach for tips/advisory as I do not have a licence to carry such activities.

I am here to showcase my adept skills in investing and trading. Over the past three years, I have meticulously back tested/ front tested my investment strategies, diligently logging each trade in a Google Sheet. My motivation behind this effort is to present my consistently profitable track record to prominent fund managers. My ultimate aspiration is to be entrusted with managing portfolios exceeding 10 crores—a goal I passionately strive for.

Although I lack formal financial degrees such as a CFA or an IIM qualification, I hold a certification in NCFM technical analysis only. My approach is grounded in a comprehensive understanding of market technical analysis and a deep-rooted commitment to refining my craft. I am eager to contribute my expertise to the world of finance and investment, leveraging my proven performance as a testament to my capabilities.

I have meticulously developed and implemented 3 to 4 highly effective setups that have consistently yielded a Compound Annual Growth Rate (CAGR) of more than 20%. These setups reflect my dedication to meticulously analyzing market trends and employing strategic techniques that yield impressive results. My goal is to not only achieve outstanding returns but also to showcase my skills to potential collaborators and partners within the financial industry.

Furthermore, my live paper trading journey is transparently displayed through a live dashboard on our website for the past three years. By clicking on the 'Dashboard' tab, visitors can access intricate details of the trades I've taken, profits booked, accuracy of predictions, Return on Investment (ROI), and more. This dashboard serves as a real-time testament to the reliability of my strategies and the discipline with

which I approach the dynamic world of investing/trading and still I am doing the same front testing on paper. I am investing/trading into my personal account with real money wef 1st Oct 2023 in "RMB leaders and wef 2024 in Swing trading"

Nothing in this world is free (Below just an example to be professionals in Investing/Trading)

Think like a Businessman and trade like a professional

[\(example\)](#)

Professional traders try to make between 20 to 50% in a year

👉 Suppose you have capital 5 lac, If Profit made in year is 25%, this comes to 1.25 lac

👉 Now think about what are you paying and what returns you are generating. This should be treated as a business expense. Invest in learning.

👉 That's the way businessmen thinks, think large and trade with a view of capital appreciation, diversify risks, multiply your investment & create wealth in long run.

[Gamblers, failed traders work this way](#) 📌

👉 They try to make 30 to 50% in a month

👉 They want free takes from everywhere and even spending ₹ 1000 per month is high for them.

👉 They get attracted towards daily ₹5000 to ₹10000 profit as shown on Social Media. In reality this never happens.

Hope you understand.

Trade smart with knowledge, gain wealth with small investment
