

Week 5: Overview

Welcome to Week 5! This week we'll be looking at the general organization of human services before looking more specifically at the healthcare system. Here, you'll learn more about human services roles within the healthcare system.

Outcomes

This week's learning outcomes are as follows:

- Describe the variety of people that human services workers serve. (CLO 2, 4)
- Explain ways that human services can be organized. (CLO 2)
- Describe the relationship between human services and related fields. (CLO 2)
- Analyze the relationship between health, health care, and health insurance. (CLO 2, 4)
- Describe the variety of health care settings, and roles for human services workers. (CLO 2, 4)

The learning materials, activities, and assignments in this module will contribute to meeting the following course learning outcomes (CLO) as stated in the syllabus. Please refer to the Course Learning Outcomes and Alignment page for more details.

- CLO 1 - Analyze strategies that support client change.
- CLO 2 - Evaluate various Human Services (HS) careers and requirements for successful HS professionals.
- CLO 3 - Apply procedures for assessing needs of individuals, families and special populations seeking HS services.
- CLO 4 - Evaluate intrapersonal and systemic barriers that may inhibit optimal functioning for people receiving HS organization services.
