**EDUCATION:**

**University of Arizona**

**July 2020 – Feb 2021**

Full Stack Developer Boot Camp Certificate

**Jawaharlal Nehru Technological University, India**

**Aug 2011 – May 2015**

Bachelor of Science in Computer Science and Engineering

**SUMMARY:**

- 4+ years of Experience in Design, development, Support and maintenance of Applications.
- Hands-on experience in developing software application modules by following **AGILE** and **SCRUM** Methodology.
- Expertise in implementation of Software Development Life Cycle (SDLC) from initiation to disposition.
- Willingness to learn new technologies and contribute towards team success.
- Good at effectively communicating with peers and promptly met deadlines.

**Technical Skills:**

Technologies Used: Java, jQuery, JavaScript, HTML5, CSS3, Bootstrap, Node.js, React.js

Database: MySQL, MongoDB

Version control/Build Tools: Git, SVN

API testing tools: Postman, Insomnia

IDE: Eclipse, Visual Studio

Log Analysis Tools: Splunk, Kibana

**PROFESSIONAL EXPERIENCE:**

**Employer: SoftPro Global Inc**

**Oct 2021 – till date**

**Client: USAA**

**Role: React Developer**

**Responsibilities:**

- Contributed new thoughts and coordinated those ideas proactively in the team.
- Implemented various screens for the front end using React.js and used various predefined components from NPM and redux library.
- Developed UI screens using HTML5, CSS3, jQuery, JavaScript and React.
- Worked on writing AJAX calls to serverside APIs to fetch the data and to implement front end /user interface features in the application.

- Created and implemented a custom CSS grid system, with CSS media queries for mobile responsiveness.
- Migrated legacy React Flux store to Redux store with React Hooks
- Debug production issues using chrome debugger tools.
- Develop new styled components to replace legacy applications and simultaneously migrate it to react.
- Built Restful web API with **Spring Boot**, and testing **APIs** using Postman.

**Client: WhatsCookin**

**March 2021- Aug 2021**

**Role: Web Developer**

**Responsibilities:**

- Worked with making calls to APIS to fetch the data from the backend as JSON response and parse it on the UI for DOM/CSS manipulation.
- Used Docker to containerize an application.
- Lead Storybook component library development to provide a common language for design and development.
- Used GIT as the code repository and version control.

**Employer: Wipro Limited**

**May 2019 - Sep 2019**

**Client: BestBuy**

**Role: Java Developer**

**Responsibilities:**

- Handled Browser compatibility issues for different browsers related to CSS and HTML.
- Involved in code reviews and enhancement of application.
- Produced client side validation through JavaScript and Ajax for asynchronous communication.
- Handled build and deployment processes in various environments.
- Experience in Service Request/Incident/Problem/Change Management
- Effectively documented the issues resolving problem incidents so that it would be helpful for newcomers when they face the same issue, demonstrating strong written communication skills and accurate attention to details.
- Successfully resolved high priority Incidents, demonstrating ability to work under high pressure.

**Employer: Infosys, India**

**May 2015 – Oct 2017**

**Role : Systems Engineer**

**Responsibilities:**

- Designed and developed User Interface using HTML5, CSS, and JavaScript. Created sites using various Content Management Systems, and theming semantically with HTML, CSS and adding interactivity with JavaScript and libraries like jQuery.
- Style responsive views and modules with Bootstrap, CSS, Less, JS, and jQuery.
- Experience in SPLUNK and dashboard creation
- Used SVN for project and version management
- Implemented regression testing and integration testing.

- Took the Initiative and worked on Automated scripts development using Shell, Perl for health checks and monitoring of the application (Error monitoring and other parameters such as CPU, memory, thread and performance parameters) which reduced manual work.
