

## DIONNE WILLIAMS INTERNATIONAL MINDSET COACH ANNOUNCES THE LAUNCH OF ONLINE TRAINING COURSE CLARITY TO LAUNCH

Dionne Williams is beaming to announce the launch of her long awaited program for highly skilled, ambitious professionals who are held back by their fears and feelings of imposter syndrome in 'Clarity to Launch'.

The program, not only teaches how to cultivate deep levels of inner confidence, but also helps build the emotional resilience required as leaders, to grow a business successfully, despite the fears & obstacles that present themselves.

"I think this is what most teachings miss out on. We as human beings are innately set up to avoid what is uncomfortable, the inner feelings that come from stretching outside of our comfort zone, & If we don't address this tendency to move away from anything that feels uncomfortable, many very highly experienced & talented potential world changers, will never be heard from, simply because they've given into the conditioned stories of their minds. Which is to avoid the very things that will give them a sense of fulfillment"

Clarity to Launch helps those that wish to overcome that internal battle, as it provides not only the tools to overcome the limiting self talk but more importantly the emotional turmoil that arises as we step outside of our comfort zone.

"You can take most strategies and win at them, if, and only if, you have the emotional tenacity & resilience to do so," says Dionne. "Without that, you're likely to lower your goals & standards or give up on them completely".

If you are able to get on the waiting list, you will get an opportunity to have a discovery call with Dionne & a chance to see how she can help you, up close and personal in her 4 day introductory experience from 17th to the 20th May 2021.

Dionne is an ex - Senior Business Manager for Natwest Bank in LONDON, UK and an International Transformational Mindset Coach for entrepreneurs. She has helped thousands of entrepreneurs to start & grow their businesses, change their actions & internal narratives to allow for more success & wealth.
